CRUISE CONTROL*

This cruise control, of the new generation, is linked with the speed limiter. It has a display on the instrument panel to indicate the memorised reference speed.

It enables the vehicle to maintain a steady speed programmed by the driver.

In order for it to be memorised or activated, the vehicle speed must be greater than 25 mph (40 km/h) with at least fourth gear engaged for vehicles fitted with a manual gearbox.

On vehicles fitted with an automatic gearbox, the lever must be in position D, or in at least second gear in sequential mode.

Instrument panel display

When the cruise control function is activated, pressing this button enables you to display the distance recorder.

After a few seconds or when this button is pressed again, the display returns to the cruise control function.

Selecting the function

- Place switch 1 in the CRUISE position. The cruise control is not yet active and no speed has been memorised. The display indicates:

First activation/memorising a reference speed

As soon as you reach the chosen speed, press button 2 or 3. This memorises the speed and the display indicates (e.g. at 70 mph (110 km/h)):

Note: It is possible to accelerate and drive momentarily at a speed greater than the memorised speed. The value memorised flashes. When the accelerator pedal is released, the vehicle will return to the memorised speed.
