Interactions Between China's National Emissions Trading Scheme and Electricity Market: Practices and Policies Tsun Se Cheong, Xunpeng (Roc) Shi, Yongping Sun, Jian Yu, Xin Yao, 2023-11-03 China s national carbon market the world s largest emissions trading scheme ETS kicked off its first online trade recently This can be called a milestone for the country towards the nation s goals of having CO2 emissions peak before 2030 and achieving carbon neutrality by 2060 China

s national ETS initially covers the power sector before being expanded to a much broader set of energy intensive industries On one hand the electricity sector the largest carbon emitting industry is responsible for about 40% of China s emissions and it has great significance to response to global climate change On the other hand the effectiveness of China s ETS will rest on how well it is coordinated with power market regulations and policies In this regard the deepening of reform as well as the advanced technology and its applications in the electricity market will add new challenges and opportunities to electricity trade which in turn influences national ETS Therefore this brings urgency to accurately capture the dynamic interactions between national ETS and electricity market to transform carbon trading into a practical and effective way to decarbonize the power sector
