

AP[®] Chemistry Practice Multiple Choice Questions with Tyler DeWitt

Background Information:

We wrote these questions to be as similar as possible to the type of questions that are asked on the real test. You'll get a sense of the strategies you need to use, and you'll see many of the common tricks and traps.

This set of questions is only a third as long as a real test (30 minutes instead of 90 minutes). You'll be able to do it much more quickly. However, this also means we weren't able to include questions on every single topic. Still, the selections are very representative.

Instructions:

We really recommend printing this packet out on paper, to make the experience as realistic as possible. Take 30 minutes to complete these problems. Set a timer!

The test packet contains a periodic table, an equation sheet, and an answer sheet.

Remember to fill your answers into the answers sheet. On the real test, if the answers aren't bubbled in when the time ends, they don't count!

Good luck!

For in-depth explanations of the answers and videos for each question, check out: www.tdwsience.com/apchem-resources
