Dilemmas of Authenticity Zaid Adhami, 2025-05-07 The past two decades have witnessed pervasive anxieties in US Muslim communities around a perceived crisis of faith As Zaid Adhami argues in this richly textured ethnography these

concerns are fundamentally about the pressures and dilemmas of authenticity what it really means to be a Muslim While discussions about authenticity in Islam typically focus on maintaining tradition and competing claims to true Islam Adhami focuses instead on the powerful idea of being true to one's own self and what it means to have genuine belief Drawing on extensive conversations with American Muslims and careful readings of broader communal discourse Adhami shows that this drive for personal authenticity plays out in complicated ways It can produce deep doubt while also serving as the grounds to affirm tradition It can converge with revivalist modes of piety but it can also prompt emphatic challenges to communal orthodoxies Through vivid storytelling and sensitive analysis Adhami illuminates why religious doubt is often a source of intense anxiety in today's world and how people maintain their faith despite such unsettling uncertainty *Time Work* Michael G. Flaherty, Lotte Meinert, Anne Line Dalsgård, 2020-06-09 Examining how people alter or customize various dimensions of their temporal experience this volume discovers how we resist external sources of temporal constraint or structure These ethnographic studies are international in scope and look at many different countries and continents They come to the overall conclusion that people construct their own circumstances with the intention to modify their experience of time Tenth Golden Strategies for Great Time Management Dr. Abdulwahab Bin Shmailan, 2018-05-10 This is about time management and planning by using criteria that maintain the good investment of time in our lives It is also one of the most important management factors for a man's success and goal achievement Peter Drucker in 1982 said Time is the most valuable resource for a manager If he could not manage his time he would not be able to manage anything That is why time management is considered as one of the essential issues that man should care about Most studies related to time management confirmed that good governance is closely related to performance improvement and productivity enhancement Francis Bacon said Time is the scale of management as money is the scale of commodities and goods Although time is a unique commodity it is equally given to each individual regardless of job or location So time passes in a constant and limited speed But it seems that no one has enough time We also cannot create more time We have to manage using the time given to us **Learning from Islam** Kamal Al-Kanady, 2012-05 An immigrant white Christian businessman from Canada writes about his experiences in a majority Islamic country in the Middle East This book is a call to humility and inclusion in Christian Muslim dialogue Regular everyday Muslims and Christians need to be building bridges investing in understanding and approaching each other with a humble orthodoxy Back cover **New Approaches to Islam in Film** Kristian Petersen, 2021-04-26 Many global film industries fail in expanding the role of Muslims on screen Too often they produce a dichotomy between good and bad Muslims limiting the narrative domain to issues of national security war and terrorism Naturally much of the previous scholarship on Muslims in film focused on stereotypes and the politics of representation This collection of essays from an international panel of contributors significantly expands the boundaries of discussion around Muslims in film asking new questions of the archive and magnifying analyses of particular cultural productions The volume

includes the exploration of regional cinemas detailed analysis of auteurs and individual films comparison across global cinema and new explorations that have not yet entered the conversation The interdisciplinary collection provides an examination of the multiple roles Islam plays in film and the various ways Muslims are depicted Across the chapters key intersecting themes arise that push the limits of how we currently approach issues of Muslims in cinema and ventures to lead us in new directions for future scholarship This book adds new depth to the matrix of previous scholarship by revisiting methodological structures and sources as well as exploring new visual geographies transnational circuits and approaches It reframes the presiding scholarly conventions in five novel trajectories considering new sources exploring new communities probing new perspectives charting new theoretical directions and offering new ways of understanding conflict in cinema As such it will be of great use to scholars working in Islamic Studies Film Studies Religious Studies and Media
