Introduction To Guide to Employing Renewable Energy and Energy Efficient Technologies

1. PURPOSE: This X-File gathers, organizes, and synthesizes knowledge gleaned by the Marine Corps Warfighting Laboratory, utilizing lessons learned from the Experimental Forward Operating Base (ExFOB) process and from limited experimentation, pre-deployment training, and post-deployment reports. It is in a format that can be quickly read and easily transported in the cargo pocket of the utility uniform, so easy-to-use information is immediately available to all levels of command.

2. SCOPE: This X-File consolidates knowledge on technologies that were evaluated during the ExFOB process in close cooperation with the Commandant's Expeditionary Energy Office (E2O). These technologies have proven to reduce the logistic footprint of Marines operating from austere operating locations in Afghanistan. All of the systems described in here can be found in open-access sources.

b. We have outlined the capabilities of the technology and clarified how it could be employed.

c. We do not replace any Government-issued Technical Manuals, nor is this knowledge intended to replace any existing tactical warfighting fundamentals.

d. Our goal is to optimize potential use of the technologies in conjunction with established Marine Corps doctrine, orders, and higher-level policy guidance.

3. HANDLING INSTRUCTIONS: This X-File is approved for public release; distribution is unlimited.
