Time, Space, and Women's Lives in Early Modern Europe
 Anne Jacobson Schutte, Thomas Kuehn, Silvana Seidel Menchi, 2001-09-01 This collection offers a variety of approaches to aspects of women's lives It moves beyond men's prescriptive pronouncements about female nature to women's lived experiences replacing the singular woman with plural women and illuminating female agency The contributors show that women's lives changed over the life course and differed according to region and social class They also demonstrate that in the early modern period the largely private spaces in women's lives were not enclosed worlds isolated from the public spaces in which men operated Contributors to this important collection are leading international scholars and offer strong substantial and archival based research

The Antigallican Monitor and Anti-Corsican Chronicle, 1814 *The Breeder's Gazette*, 1918 New Jersey Register, 2009 *The Annals of Pharmacotherapy*, 1992 *Nursing Times, Nursing Mirror*, 2000 Censorship and Civic Order in Reformation Germany, 1517-1648 Allyson F. Creasman, 2016-04-15 The history of the European Reformation is intimately bound up with the development of printing With the ability of the printed word to distribute new ideas theologies and philosophies widely and cheaply early modern society was quick to recognise the importance of being able to control what was published Whilst much has been written on censorship within Catholic lands much less scholarship is available on how Protestant territories sought to control the flow of information In this ground breaking study Allyson F Creasman reassesses the Reformation's spread by examining how censorship impacted upon public support for reform in the German cities Drawing upon criminal court records trial manuscripts and contemporary journals mainly from the city of Augsburg the study exposes the networks of rumour gossip cheap print and popular songs that spread the Reformation message and shows how ordinary Germans adapted these messages to their own purposes In analysing how print and oral culture intersected to fuel popular protest and frustrate official control the book highlights the limits of both

the reformers's influence and the magistrates's authority The study concludes that German cities were forced to adapt their censorship policies to the political and social pressures within their communities in effect meaning that censorship was as much a product of public opinion as it was a force acting upon it As such this study furthers debates not only on the spread and control of information within early modern society but also with regards to where exactly within that society the impetus for reform was most strong *The National Cyclopedia of American Biography* ,1902
