**Abstract:** Peer pressure is influential in swaying adolescents' actions and decisions. To investigate the holistic influence of peer pressure on adolescence, this paper conducts literature reviews on peer pressure's influence on adolescents regarding risky behavior, romantic relationships, and academic investment. The results show that peers are capable of bringing up and down adolescents' rate of engaging in risky behavior depending on the quality of the friendship. Peers influence adolescent sexual behavior and partner selection, and they have a high level of intervention in their romantic relationships, presenting both positive and negative influences. Peers influence adolescents' effort exerted on academic work depending on the type of image that adolescents are trying to maintain and the degree to which an adolescent's school value hard work. The paper also traces the biological and sociocultural causes of peer pressure's huge influence on adolescents and provides recommendations for alleviating negative peer pressure.

**Keywords:** peer pressure, adolescents, risky behavior, romantic relationship, academic performances

## **1. Introduction**

Peers are groups of people who share similar interests, ages, backgrounds, or social standing. They are an essential source of knowledge, criticism, and support for people as they develop their sense of self. The presence of peers is particularly important during adolescence because adolescents start to shift from spending quality time with families to spending time with friends and peers. Peers become a safe arena where adolescents can experiment, learn, and maintain certain social norms with peers, prompting adolescents' competence while trying to find their identity and autonomy on the path to becoming adults. As significant as peers' role in adolescents, peer pressure is often inevitable. Peer pressure happens when peers exert pressure on adolescents to engage or not engage in certain behavior. Such pressure can be as explicit as spoken or direct peer pressure or as subtle as unspoken and indirect peer pressure, but it is equally influential on adolescents, who crave peer acceptance and novel experiences. Currently, there is extensive psychological research on peer pressure's influence on different activities like investment, substance, aggression, and many more. However, a more holistic view of the role that peer pressure plays in adolescents' lives is limited. Therefore, due to the great influence and prevalence of peer pressure in adolescence, this essay investigates the current situation of peer pressure by examining peers' influence on adolescents regarding risky behavior, romantic relationship, and academic performance. The essay also traces the reason why adolescents
