

Purpose of Writing a Research Paper

Purpose

Focus on a problem or issue, make a logical argument and assert a position. You do not simply want to describe a topic, but critically give thoughts and opinions about it. Clearly state your paper's thesis—the main idea put forth. While drawing on ideas and theories from others in the field who have written about the topic, the purpose should revolve around giving new perspective.

Features

The introduction must alert the reader to the topic. Your thesis should describe an idea, pose a question or outline key issues. In the body of the paper, provide an overview of your key arguments. The conclusion should bring it all together. The goal is not to repeat the introduction. The paper should creatively summarize the thesis and present the reader with a response, or point to gaps in the literature.

Things to Consider

Use MLA format. In order to avoid accusations of plagiarism, you must cite external sources. Finally, always place the works cited or bibliography list for references at the end of the paper.

Misconceptions

Do not write a research paper as a collection of your opinions. For example, a paper about how much you love television is a personal essay rather than a research paper. Instead, after researching the literature on television, you could write a paper on its social impact. A research paper starts with extensive reading, not a casual browsing of literature. If you do not read, you will not know your topic.

Research Paper Purpose Of Life:

Scientific Approach to the Meaning of Life Arturas Vaitaitis, 2024-01-17 In *Scientific Approach to the Meaning of Life* science and spirituality intertwine through the captivating narrative of the author's personal journey. This compact yet profound book draws upon a spectrum of scientific fields while also charting the complex and mixed paths of religion and science through history, aiming to shed light on one of humanity's most profound questions: What is the meaning of life? Personal experiences are beautifully melded with insights from particle physics, evolutionary biology, and historical analyses, crafting an intimate yet lighthearted account of the search for life's purpose. Perfect for readers seeking a personal and intellectually stimulating exploration of life's most significant question, *Scientific Approach to the Meaning of Life* offers a compelling intersection of science, history, and personal discovery. This book promises a unique journey through the dimensions of existence, shaped by the author's scientific insight and personal journey.

Research Methods in Palliative, Supportive, and End-of-Life Care, 2025-05-26 Palliative and end-of-life care are concerned with the physical, social, psychological, and spiritual care of people with advanced disease and serious illness. They affect people in all societies, all countries, and are growing fields. Post-Covid, changing demographics and treatments mean that people are living longer with serious illness and multiple conditions, often needing symptom control and complex care and support. Research in these areas presents a particular challenge, both because of the ethical and practical difficulties inherent in working with very ill patients and their families, and because of the range of research questions considered to be within the domain of palliative care. Building on the first edition, this book provides an introduction to research methods in the fields of palliative, supportive, and end-of-life care and complex patients. Edited by six experienced palliative care academics with acknowledged expertise and international reputations in this field, this book is both authoritative and accessible. It encompasses methods used in both clinical and health services research, covering methodological theory, design, measures, and practice, and case examples across the entire scope of research. The book has been fully updated and includes the latest developments, such as use of big data and forming research collaborations. This will be an essential methodological book for clinicians, academics, researchers, and educators, and especially those undertaking a MSc, PhD, or early career researchers in palliative care and related fields.

Quality-of-Life Research in Chinese, Western and Global Contexts Daniel T.L. Shek, Ying Keung Chan, Paul S.N. Lee, 2005-09-26 The majority of studies on the quality of life have been conducted in Western contexts and are based on Western participants. Comparatively speaking, there are only a few studies that have been conducted in different Chinese contexts. Also, there are fewer QOL studies based on children and adolescents or studies that examine the relationship between QOL and economic disadvantage. In addition, more research is needed to address the

methodological issues related to the assessment of quality of life This volume is a constructive response to the challenges described above It is the first book to cover research in Chinese Western and global contexts in a single volume It is a ground breaking volume in which Chinese studies on the quality of life are collected The book includes papers addressing family QOL quality of life in adolescents experiencing economic disadvantage and methodological issues in the assessment of QOL It is written by researchers working in a variety of disciplines

New Directions in the Study of Late Life Religiousness and Spirituality Susan H. Mcfadden, Mark Brennan, 2014-05-01 Examine the questions of how what and why associated with religiousness and spirituality in the lives of older adults New Directions in the Study of Late Life Religiousness and

Spirituality explores new ways of thinking about a topic that was once taboo but that has now attracted considerable attention from the gerontological community. It examines various approaches to methodology and definition that are used in the study of religion, spirituality, and aging. In addition, it explores the ways that gerontological research can highlight the role of religion and spirituality in the lives of older adults. The first section will introduce you to new ways of thinking about research methodology and data analysis that can be applied to studying the complexity of older adults' religious, spiritual practice, and beliefs. You will learn several approaches to the study of phenomena that are both personal and also deeply embedded in community. The second section addresses issues of definition, exploring important questions that call for critical reflection, such as: What are we studying? What social and psychological influences shape our thinking about definition? Do the definitions used by gerontologists match those held by older people? The final section moves the study of religion, spirituality, and aging beyond a focus on health and mortality to examine well-being more broadly in the context of the life experiences of older adults. Here is a small sample of what you will learn about in *New Directions in the Study of Late Life Religiousness and Spirituality*:

- structural equation modeling: a statistical method designed to capture the dynamics inherent in the passage of time
- feminist qualitative methods for studying spiritual resiliency in older women
- spirituality as a public health issue
- the differences between groups of older people in the way they define religion and spirituality
- the psychosocial implications of two types of religious orientation: dwelling and seeking
- older women's responses to the experience of widowhood and to the question of whether their religious beliefs were affected by the experience
- how social context influences our decisions and our interpretations of people's religious beliefs, behaviors, and experiences
- the ways that people caring for a spouse with dementia rely on religious coping
- a model that delineates three different ways people relate to God in coping
- and a study that asks whether these types of coping produce different outcomes for caregivers
- how people adjust to bereavement as a function of their beliefs about an afterlife

Handbook of Social Indicators and Quality of Life Research
Kenneth C. Land, Alex C. Michalos, M. Joseph Sirgy, 2011-11-25

The aim of the *Handbook of Social Indicators and Quality of Life Research* is to create an overview of the field of Quality of Life (QOL) studies in the early years of the 21st century that can be updated and improved upon as the field evolves and the century unfolds. Social indicators are statistical time series used to monitor the social system, helping to identify changes and to guide intervention to alter the course of social change. Examples include unemployment rates, crime rates, estimates of life expectancy, health status indices, school enrollment rates, average achievement scores, election voting rates, and measures of subjective well-being such as satisfaction with life as a whole and with specific domains or aspects of life. This book provides a review of the historical development of the field, including the history of QOL in medicine and mental health, as well as the research related to quality of work life (QWL) programs. It discusses several of QOL's main concepts: happiness, positive psychology, and subjective well-being. Relations between spirituality and religiousness and QOL are examined, as are the effects of educational attainment on QOL and

marketing and the associations with economic growth The book goes on to investigate methodological approaches and issues that should be considered in measuring and analysing quality of life from a quantitative perspective The final chapters are dedicated to research on elements of QOL in a broad range of countries and populations
