## **1. Introduction**

The aim of this research guide is to give an introduction to some of the main debates regarding internal displacement. Although the guide concentrates on conflict induced internal displacement, causes of internal displacement are extremely complex and the displacement of populations due to environmental change, natural disasters, and development projects is often interlinked with and simultaneous to conflicts causing the forced movement of people (Banerjee et al. 2005, Birkeland 2003a,b, Cernea and McDowell 2000, Haug 2003, Lund 2003, Muggah 2003, Qadem 2005).

It is easy when discussing internal displacement to fall into an instrumental language and deal only with concepts, definitions and categories. This research guide aims to summarise the challenge of internal displacement at a policy level, but also to address its social consequences and explore the experiences of many internally displaced persons (IDPs) of physical dislocation, separation from everyday practices and familiar environments, social disruption and material dispossession.

## **Research Guide On Internal Displacement Cathrine Brun:**

*Afrodescendant Resistance to Deracination in Colombia* Aurora Vergara-Figueroa, 2017-10-26 This book provides a socio historical analysis of the 2002 massacre at Bellavista Bojay Choc Colombia The author examines how the concepts of forced displacement and migration could be formulas for historical erasure These concepts are used to name populations such as the survivors of this massacre and are limited in their ability to contribute to the demands for reparation of the affected populations Instead based on an ethnographic study of the pain and suffering generated in the survivors the book proposes the concept of deracination as a tool to study land dispossession It captures both the complex local specificities the global linkages of this phenomenon and the strategies of resistance used by the people of this community to channel what seems as an impossible mourning

The Tsunami of 2004 in Sri Lanka Ragnhild Lund, Piers Blaikie, 2013-10-18 This book is based on empirical research in Sri Lanka conducted after the catastrophic tsunami which hit the country in December 2004 The aims of the research have been to develop new knowledge on post crisis reconstruction and recovery work on how to bridge the knowledge gap between researchers and practitioners as well as trying to use past research experiences from Sri Lanka to learn about the present day situation The chapters use a common analytical frame related to the policy narratives of post tsunami recovery in the shadow of war and deal with housing reconstruction livelihoods internally displaced humanitarian interventions and protracted conflicts The authors represent various social scientific fields and they have experience from different geographical areas of Sri Lanka This book was published as a special issue of Norsk Geografisk Tidsskrift

*Spatial Violence* Andrew Herscher, Anooradha Siddiqi, 2018-02-02 This book poses spatial violence as a constitutive dimension of architecture and its epistemologies as well as a method for theoretical and historical inquiry intrinsic to architecture and thereby offers an alternative to predominant readings of spatial violence as a topic event fact or other empirical form that may be illustrated by architecture Exploring histories of and through architecture at sites across the globe the chapters in the book blur the purportedly distinctive borders between war and peace framing violence as a form of social political and economic order rather than its exceptional interruption Regarding space and violence as co constitutive the book's collected essays critique modernization and capitalist accumulation as naturalized modes for the extraction of violence from everyday life Focusing on the mediation of violence through architectural registers of construction destruction design use representation theory and history the book suggests that violence is not only something inflicted upon architecture but also something that architecture inflicts In keeping with Walter Benjamin's formulation that there is no document of civilization that is not also a document of barbarism the book offers spatial violence as another name for architecture itself This book was previously published as a special issue of Architectural Theory Review

Refugia Robin Cohen, Nicholas Van Hear, 2019-12-06 This is an unusual book Combining social science fiction utopianism pragmatism sober analysis and innovative social theory the authors address one of the biggest dilemmas of our age how to solve the problems arising from mass displacement As early versions of the solution proposed by Robin Cohen and Nicholas Van Hear filtered out their vision

of a new networked transnational archipelago called Refugia was immediately denounced or met with scepticism by established refugee scholars Others were more intrigued more open minded or perhaps just holding their fire until this book was finally published As it at least has the virtue of originality why not judge the proposal for yourself Read it and craft your own critique The authors have initiated an openly pro refugee vision that all can help to shape Written in a clear and direct style this book will appeal to scholars students practitioners and an informed public ready to engage with this pressing issue
