Defense Logistics Studies Information Exchange,1967 Montgomery and Colossal Cracks Stephen Hart,2000-05-30 A reinterpretation of the British Army s conduct in the crucial 1944 45 Northwest Europe campaign this work examines systematically the Colossal Cracks operational technique employed by Montgomery s Anglo Canadian 21st Army Group and demonstrates the key significance that morale and casualty concerns exerted on this technique To ensure a full understanding of the campaign one needs to look not only at Montgomery s methods but at those of his army commanders Dempsey and Crerar thus this study addresses the scant attention to date paid to these two figures Hart suggests that

Montgomery and his two senior subordinates handled this formation more effectively than some scholars have suggested. In fact, *Colossal Cracks* the concentration of massive force at a point of German weakness represented the most appropriate weapon the 1944 British Army could develop under the circumstances. Previous studies have been characterized by an overemphasis on Montgomery's role in the campaign rather than a systematic examination of overall British methods. They have ignored the difficulties that the 1944 British Army faced given its manpower shortage and they have underestimated the appropriateness of Monty's methods to the campaign war aims that Britain pursued, namely the desire that Britain's modest military forces secure a high profile within a larger Allied effort. The cautious firepower-laden approach used by the 21st Army Group was both crude and a double-edged sword; however, despite these weaknesses, *Colossal Cracks* represented an appropriate technique given the nature of British war aims and the relative capabilities of the forces involved. It proved to be just enough to defeat the Germans and keep alive British hopes that her war aims might be achieved. *Paper*, 1919

**Select Documents on Japanese War Crimes and Japanese Biological Warfare, 1934-2006**, The enactment of the Japanese Imperial Government Disclosure Act P L 106 657 and the issuance of Executive Order 13110 Jan 11 1999 aimed at making U S government records related to Japanese war crimes and war criminals in World War II more accessible. Records surveys implementing these requirements disclosed that there were relatively few remaining security classified relevant documents waiting for disclosure. On the other hand, better identification of relevant documents and improved access to these records was a primary goal of the White House. The Interagency Working Group (IWG) staff took up the admonition from the National Security Advisor that Agencies should bring to light hitherto unknown relevant unclassified or declassified records encountered in the course of the search for relevant classified records. In selecting documents, the IWG Staff focused on several subjects and topics that have longstanding interest and concerns for researchers: Japanese research and experiments in biological warfare (BW); Japanese instigation of biological warfare attacks in World War II; Japanese biological warfare experiments on living humans and animals; Japanese atrocities against prisoners of war; Japanese atrocities against civilian populations; Allied decisions to hold Japanese responsible for war crimes; Allied decisions to hold war crimes trials; Allied decision to consider Emperor Hirohito as a person responsible for war crimes; Allied decisions to investigate specific Japanese scientists and military personnel for BW crimes; American POWs held at Mukden POW Camp Hoten and any evidence of BW experiments on them. Some subjects of current interest such as comfort women were specifically searched for but with little success. This collection will continue to expand as new documents are discovered.

The Royal Navy and Anti-Submarine Warfare, 1917-49 Malcolm Llewellyn-Jones, 2005-12-08. An essential new account of

how anti submarine warfare is conducted with a focus on both historic and present day operations This new book shows how until 1944 U boats operated as submersible torpedo craft which relied heavily on the surface for movement and charging their batteries This pattern was repeated in WWII until Allied anti submarine countermeasures had forced the Germans to modify their existing U boats with the schnorkel Countermeasures along also pushed the development of high speed U boats capable of continuously submerged operations This study shows how these improved submarines became benchmark of the post war Russian submarine challenge Royal Navy doctrine was developed by professional anti submarine officers and based on the well tried combination of defensive and offensive anti submarine measures that had stood the press of time since 1917 notwithstanding considerable technological change This consistent and holistic view of anti submarine warfare has not been understood by most of the subsequent historians of these anti submarine campaigns and this book provides an essential and new insight into how Cold War and indeed modern anti submarine warfare is conducted *Parliamentary Papers* Great Britain.
