Survival of the City Edward Glaeser,David Cutler,2022-09-06 Expansive and entertaining A fast paced and highly readable journey the book serves as a useful tool in the effort to redefine the role of the city in an age of increasingly polarized politics and reminds us that urban health is as Fiorello La Guardia once remarked about cleaning the streets not a Democratic or Republican issue New York Times Book Review One of our great urbanists and one of our great public health experts join forces to reckon with how cities are changing in the face of existential threats the pandemic has only accelerated Cities can make us sick That s always been true diseases spread more easily when more people are close to one another And cities have been demonized as breeding grounds for vice and crime from Sodom and Gomorrah on But cities have flourished nonetheless because they are humanity s greatest invention indispensable engines for creativity innovation wealth and civilization itself But cities now stand at a crossroads During the global COVID crisis cities grew silent the normal forms of socializing ground to a halt How permanent are these changes Advances in technology mean that many people can opt out of city life as never before Will they Are we on the brink of a post urban world City life will survive but individual cities face terrible risks argue Edward Glaeser and David Cutler and a wave of urban failure would be absolutely disastrous In terms of intimacy and inspiration nothing can replace what cities offer But great cities have always demanded great management and our current crisis has exposed fearful gaps in our capacity for good governance In America Glaeser and Cutler argue deep inequities in health care and education are a particular blight on the future of our cities solving them will be the difference between our collective good health and a downward spiral to a much darker place

Eliminating the Achievement Gap William Jeynes,2019-10-04 The purpose of the Eliminating the Achievement Gapis to provide a resource for scholars and students into many of the most salient issues trends and factors that are most effective in reducing the achievement gap Eliminating the Achievement Gap is particularly unique because it will 1 utilize a meta analysis to determine what factors contribute the most to reducing the achievement gap and 2 examine potential achievement gap reducing variables from across disciplines These disciplines include education sociology economics family science psychology public policy and educational psychology The second emphasis is largely based on the meta analysis because the results of the meta analysis indicate that the best way to completely eliminate the achievement gap is to initiate a multidisciplinary

approach to the achievement gap It is the intention of this book to make scholars educators policymakers parents and the general public more aware of the factors that best bridge the achievement gap so that they can take major steps to implementing comprehensive and multidisciplinary efforts The more such efforts are inaugurated the more the achievement gap will be reduced The nine chapters of this book are therefore divided into four parts to reflect this extent of this comprehensive approach
