Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy
research in over fty chapters written by nearly ninety leading researchers from a number of countries It is organized into ve
broad sections which capture many of the current dominant educational policy foci and at the same time situate current
understandings historically in terms of both how they are conceptualized and in terms of past policy practice The chapters
themselves are empirically grounded providing illustrations of the conceptual implications c tained within them as well as
allowing for comparisons across them The se re exivity within chapters with respect to jurisdictional particularities and c
trasts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and
policy ideas play out in di erent times and places The sections move from a focus on prevailing policy tendencies through
increasingly critical and outsider perspectives on policy They address in turn the contemporary strategic emphasis on large
scale reform substantive emphases at several levels on leadership and governance improving teacher quality and
conceptualizing learning in various domains around the notion of literacies and concluding nally with a contrasting topic
workplace learning which has had less policy attention and thus allows readers to consider both the advantages and
disadvantages of learning and teaching under the bright gaze of policy **The National Union Catalogs, 1963-** ,1964
