The NexStar User's Guide Michael Swanson, 2012-12-06 Celestron's NexStar telescopes along with Meade's ETX and LX ranges together dominate the international market for affordable computer-controlled go-to telescopes. Michael Swanson has written this complete, detailed guide to buying, using and maintaining NexStar telescopes to appeal to all buyers or potential buyers of these telescopes. It contains just about everything from basic descriptions of models to technical details of alignment and even programming. A User's Guide to the Meade LXD55 and LXD75 Telescopes Martin Peston, 2010-04-28 I have owned telescopes for over 25 years since I was a young lad. I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK. I am also a proud owner of an LXD75 SC 8. Armed with these two very different telescopes, I have spent many hours searching the skies for interesting objects using Meade's Autostar Goto facility. My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55.com website. From then on, I have had regular emails from people asking technical questions about the telescope and which model is best suited for them. Whilst attending Star parties in the UK, I found that many LXD owners would struggle to use them even at a basic level, especially if they have never owned or used an equatorially mounted Goto telescope before. Since the first LXD55 models came out in early 2002, owners have struggled to find useful information to help them use the telescopes to the best advantage. There have been mixed reactions about its quality and performance. Hence, this book is directed towards those who are new to Goto and the LXD telescope.

A Guide to Hubble Space Telescope Objects James L. Chen, Adam Chen, 2015-07-16 From the authors of *How to Find the Apollo Landing Sites*, this is a guide to connecting the view above with the history of recent scientific discoveries from the Hubble Space Telescope. Each selected HST photo is shown with a sky

map and a photograph or drawing to illustrate where to find it and how it should appear from a backyard telescope Here is the casual observer's chance to locate the deep space objects visually and appreciate the historic Hubble photos in comparison to what is visible from a backyard telescope HST objects of all types are addressed from Messier objects Caldwell objects and NGC objects and are arranged in terms of what can be seen during the seasons Additionally the reader is given an historical perspective on the work of Edwin Hubble while locating and viewing the deep space objects that changed astronomy forever Countless people have seen the amazing photographs taken by the Hubble Space Telescope But how many people can actually point out where in the sky those objects are Why were these objects chosen to be studied What discoveries were made from the Hubble Space Telescope photographs This book is for anyone who wants answers to these questions
