Essays on Strategy Analysis for Seaports Elvira Haezendonck, 2001 The increasingly competitive market environment in which port clusters operate today imposes new requirements on port strategy analysis Many port authorities and port operators now realize that a static approach to cost leadership a sole focus on inherited factor advantages and a simplistic reliance on new infrastructure to attract or retain clients are no longer sufficient to guarantee a port's competitive success They need to offer greater value added to port users as well as to society Hence this new market environment forces ports to reconsider their present strategic position and to reflect on the strategic options for the future The book builds upon an in depth survey of economic actors in the Antwerp seaport cluster with a specific focus on the container and conventional cargo clusters It attempts to answer the question why these particular port clusters are more competitive than similar clusters in other ports In order to answer this question the study develops and extends a number of formal tools of strategy analysis that should be useful to both port authorities and port operators

Abdelaaty, 2021-01-22 What explains the variety of responses that states adopt toward different refugee groups Refugees might be granted protection or turned away they might be permitted to live where they wish and earn an income pursue education and access medical treatment or they might be confined to a camp and forced to rely on aid while being denied basic services However states do not consistently wield their capacity for control nor do they jealously guard their authority to regulate In this book Lamis Elmy Abdelaaty asks why states sometimes assert their sovereignty vis vis refugee rights and at other times seemingly cede it by delegating refugee oversight to the United Nations To explain this selective exercise of sovereignty Abdelaaty develops a two part theoretical framework in which policymakers in refugee receiving countries weigh international and domestic concerns Policymakers in a receiving country might decide to offer protection to refugees from a rival country in order to undermine the sending country's stability saddle it with reputation costs and even engage in guerilla style cross border attacks At the domestic level policymakers consider political competition among ethnic groups welcoming refugees who are ethnic kin of citizens can satisfy domestic constituencies expand the base of support for the government and encourage mobilization along ethnic lines When these international and domestic incentives conflict the state shifts responsibility for refugees to the UN which allows policymakers to placate both refugee sending countries and domestic constituencies Abdelaaty analyzes asylum admissions worldwide and then examines three case studies in depth Egypt a country that is broadly representative of most refugee recipients Turkey an outlier that has limited the geographic application of the Refugee Convention and Kenya home to one of the largest refugee populations in the world Discrimination and Delegation argues that foreign policy and ethnic identity more so than resources humanitarianism or labor skills shape reactions to refugees

Sanctuary Practices in International Perspectives examines the diverse complex and mutating practice of providing sanctuary
to asylum seekers The ancient tradition of church sanctuary underwent a revival in the late 1970s Immigrants living without
legal status and their supporters first in the United Kingdom and then in the US Canada and elsewhere in Europe have
resorted to sanctuary practices to avoid and resist arrest and deportation by state authorities Sanctuary appeared amidst a
dramatic rise in asylum seekers arriving in Western countries and a simultaneous escalation in national and international
efforts to discourage and control their arrival and presence through myriad means including deportation This collection of
papers by prominent US European Canadian and Japanese scholars is the first to place contemporary sanctuary practices in

international theoretical and historical perspective Moving beyond isolated case studies of sanctuary activities and movements it reveals sanctuary as a far more complex varied theoretically rich and institutionally adaptable set of practices

The Private-Public Law Divide in International Dispute Resolution Burkhard Hess, 2019-03-25 This course addresses dispute resolution in international cases from the classical perspective of the private public divide The main focus relates to overlapping remedies available under private international and public international law Nowadays a multitude of courts and arbitral tribunals at different levels domestic international and transnational is accessible to litigants in cross border settings There are three different areas where the private public divide is applicable The first pertains to lawsuits in civil courts involving foreign states state enterprises and international organizations The second area relates to the delineation between domestic and international remedies The third area concerns the privatization of dispute settlement especially in the context of private ordering This study argues that the private public divide still exists and cannot be given up However one must be aware that private and public international law have complementary functions in order to address adequately the multitude of disputes at both the cross border and the international level In this context this divide can be used as an appropriate tool to explain the complementarity of private and public international law in the multilevel legal structure of a globalized world
