November 2010 N3 Science Memo

Rachel Sandford

November 2010 N3 Science Memo:

Give and Take Shirley Tillotson, 2017-11-15 Can a book about tax history be a page turner You wouldn't think so But Give and Take is full of surprises A Canadian millionaire who embraced the new federal income tax in 1917 A socialist hero J S Woodsworth who deplored the burden of big government Most surprising of all Give and Take reveals that taxes deliver something more than armies and schools They build democracy Tillotson launches her story with the 1917 war income tax takes us through the tumultuous tax fights of the interwar years proceeds to the remaking of income taxation in the 1940s and onwards and finishes by offering a fresh angle on the fierce conflicts surrounding tax reform in the 1960s Taxes show us the power of the state and Canadians often resisted that power disproving the myth that we have always been good loyalists But Give and Take is neither a simple tale of tax rebels nor a tirade against the taxman Tillotson argues that Canadians also made real contributions to democracy when they taxed wisely and paid willingly *Playing Politics with Natural Disaster*

Timothy W. Kneeland, 2020-04-15 Hurricane Agnes struck the United States in June of 1972 just months before a pivotal election and at the dawn of the deindustrialization period across the Northeast The response by local state and national officials had long term consequences for all Americans President Richard Nixon used the tragedy for political gain by delivering a generous relief package to the key states of New York and Pennsylvania in a bid to win over voters After his landslide reelection in 1972 Nixon cut benefits for disaster victims and then passed legislation to push responsibility for disaster preparation and mitigation on to states and localities The impact led to the rise of emergency management and inspired the development of the Federal Emergency Management Agency FEMA With a particular focus on events in New York and Pennsylvania Timothy W Kneeland narrates how local state and federal authorities responded to the immediate crisis of Hurricane Agnes and managed the long term recovery The impact of Agnes was horrific as the storm left 122 people dead forced tens of thousands into homelessness and caused billions of dollars in damage from Florida to New York In its aftermath local officials and leaders directed disaster relief funds to rebuild their shattered cities and reshaped future disaster policies *Playing Politics with Natural Disaster* explains how the political decisions by local state and federal officials shaped state and national disaster policy and continues to influence emergency preparedness and response to this day

The New York Times Index, 2009 **Bioengineering** Great Britain: Parliament: House of Commons: Science and Technology Committee, 2010-03-25 This report finds that the UK has an excellent research base but is still failing to maximise its potential by translating research into wealth and health The road to economic recovery will depend in part on exploitation of the UK's research base which in turn requires efficient translation to generate returns on investments Some areas of bioengineering such as stem cells have clearly benefited from strong Government leadership and support backed up by generous levels of funding from both the public and private sectors Others such as genetically modified GM crops are less well supported and funded This is curious when GM crops are considered by the Government to be safe and offer potential benefits GM crops are certainly the poor cousin in the bioengineering family and we strongly urge the Government to signal its support for GM crops as well as improving the regulatory situation in Europe Regulation of bioengineering is complex and researchers have found that regulations inhibit research and translation either because of regulatory complexity stem cells or a flawed operation of the regulatory process GM crops There are good indications that the UK is learning from past experiences in bioengineering when handling new emerging technologies such as synthetic biology The Government and Research Councils have recognised the value of synthetic biology early and are providing funding The Committee is also concerned that while research is well funded there is not enough forethought about synthetic biology translation for example developing DNA synthesis capability which would provide the UK with an excellent opportunity to get ahead internationally If this is not addressed synthetic biology runs the risk of becoming yet another story of the UK failing to capitalise on a strong research base and falling behind internationally
