

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

Masters Sculling Nancy Churchill, 2020-09-01 Masters scullers range in age from Grade AA 21 in the US or Grade A 27 in the UK to Grade M 89 plus. Although diverse in age, these athletes all have one thing in common: they are each unique. This book partners with each individual athlete to achieve performance improvements based on their own aspirations, technical skill, and fitness level. The focus is on understanding and efficiency both in the acquisition of skills and training. The dynamic technique described offers scullers a high performance sculling approach carefully tailored to support a Masters sculler's long term career. Illustrated with superb colour photographs, diagrams, and a wealth of examples, coverage includes individual assessment of an athlete's sculling skills, flexibility, and aerobic fitness; compilation and application of evidence based data; formation of highly individual training programmes; experiments for athletes to explore their connectedness, versatility, and speed; and finally, race strategies and plans for competitive athletes. Based on the athlete's needs and aspirations, Masters Sculling provides you with the knowledge and skills to build an individual training plan that minimizes injury risk, achieves continuous improvement, and fosters a lifelong enjoyment of the sport. *Application of Visual Data in K-16 Science Classrooms*

Kevin D. Finson, Jon Pedersen, 2015-03-01 This book examines visual data use with students PK-16 as well as in pre-service and in-service science teacher preparation. Each chapter includes discussion about the current state of the art with respect to science classroom application and utilization of the particular visual data targeted by the author's discussion and explanation about the targeted visual data as applied by the author in his/her classroom; use of visual data as a diagnostic tool; its use as an assessment tool; and discussion of implications for science teaching and/or science teacher preparation. Although the body of research and practice in this field is growing, there remains a gap in the literature about clearly explicating the use of visual data in the science classroom. A growing body of literature discusses what visual data are, although this topic is still viewed as being at the beginning of its development in educators' thinking, and there are some scattered examples of studies exploring the use of visual data in science classrooms, although those studies have not necessarily clearly identified their foci as visual data per se. As interest and attention has become more focused on visual data, a logical progression of questioning has been how visual data are actually applied in the science classroom, whether it be early elementary, college, or somewhere in between. Visual data applications of interest to the science education community include how it is identified, how it can be used with students, and how students can generate it themselves; how it can be employed as a diagnostic tool in concept development; and how it can be utilized as an assessment tool. This book explores that as well as a variety of pragmatic ways to help science educators more effectively utilize visual data and representations in their instruction.

Early Childhood Education and School Readiness in India Venita Kaul, Suman Bhattacharjee, 2019-06-03 This volume makes a comprehensive assessment of the status and quality of early educational experiences at preschool and early primary grades in India. It raises a serious concern that despite high enrolment in preschools, children's school readiness

levels remain low at ages five and six and raises a vital question are Indian children getting a sound foundation for school and for later life It addresses three important issues from the Indian perspective children s school readiness at age five families readiness for school and most importantly the readiness of schools for children India is one of many countries across the global South facing an early learning crisis High quality early childhood education may be key to improving these outcomes for children yet little is known about early childhood education programs in India and their impact on children s school readiness This volume is based on a longitudinal mixed methods research study which is perhaps the first of its kind in India The study covers public provisions along with steadily expanding private pre schools and schools in rural India and provides interesting narratives and insights into the multiple pathways children are adopting in these critical early years particularly in the context of the expanding role of the private sector Written in a lucid and narrative style this volume is of interest to a diverse readership of researchers educationists and early childhood education policy makers and practitioners in terms of both its design and findings

Leveled Reading, Leveled Lives Timothy

Shanahan,2025-07-28 An engaging and evidence based examination of how reading instruction has been misinterpreted and misapplied for decades and how to right the course to improve reading skills for all students In **Leveled Reading Leveled Lives** leading literacy expert Timothy Shanahan curates a lively tour of the history of reading instruction in the United States arguing that the most popular reading instruction method is failing students and suppressing their literacy achievement He breaks down the reasons why teachers and researchers alike have favored this accepted wisdom known as instructional level theory in US schools over the past five decades and presents a compelling case for a new way forward that will bolster students reading skills Today it s not uncommon to find students in a fourth grade classroom reading books suitable for third second or even first graders Teachers suggest books to students at their deemed instructional levels but how these instructional levels are determined is suspect With a comprehensive critical analysis of instructional level pedagogy Shanahan exposes its shaky foundations and shows how faulty research findings have become so entrenched He gathers an extensive body of research studies that overwhelmingly contradict the instructional level theory and offers an evidence based consideration of how educators must instead use grade level reading to bring about maximum learning gains This seminal book concludes with practical advice for implementing grade level reading instruction including detailed descriptions of the types of instruction and scaffolding needed to increase students reading achievement from teaching decoding and

challenging texts to scaffolding reading to maintaining motivation Shanahan asserts that a better approach can ensure that all students have an opportunity to leave high school with reading abilities commensurate with their personal social civic and economic goals *National Student Assessment 2013 for Grades 3 and 5* ,2013 Discursive Self in Microblogging Daria Dayter,2016-03-10 This volume examines the language of microblogs drawing on the example of a group of eleven users who are united by their interest in ballet as a physical activity and an art form The book reports on a three and a half year study which complemented a 20 000 word corpus of tweets with semi structured interviews and participant observation It deals with two main questions how users exploit the linguistic resources at their disposal to build a certain identity and how the community boundaries are performed discursively The focus is on the speech acts of self praise and complaint and on the storytelling practices of microbloggers The comprehensive treatment of the speech act theory and the social psychological approaches to self disclosure provides a stepping stone to the analysis of identity work for which the users draw on two distinctive interpretive repertoires affiliative and self promoting **2026 CFA Program Curriculum Level I Box Set** CFA Institute,2025-05-13 Discover the official resource for success on the 2026 CFA Level I exam Get your copy of the CFA Program Curriculum now The 2026 CFA Program Curriculum Level I Box Set contains the content you need to perform well on the Level I CFA exam in 2026 Designed for candidates to use for exam preparation and professional reference purposes this set includes the full official curriculum for Level I and is part of the larger CFA Candidate Body of Knowledge CBOK Covering all ten core topics found on the Level I exam the 2026 CFA Program Curriculum Level I Box Set helps you Develop critical knowledge and skills essential in the industry Learn from financial thought leaders Access market relevant instruction The set also features practice questions to assist with your mastery of key terms concepts and formulas Volumes include Volume 1 Quantitative Methods Volume 2 Economics Volume 3 Corporate Issuers Volume 4 Financial Statement Analysis Volume 5 Equity Investments Volume 6 Fixed Income Volume 7 Derivatives Volume 8 Alternative Investments Volume 9 Portfolio Management Volume 10 Ethical and Professional Standards Indispensable for anyone preparing for the 2026 Level I CFA exam the 2026 CFA Program Curriculum Level I Box Set is a must have resource for those seeking the foundational skills required to become a Chartered Financial Analyst *Globalized Finance and Varieties of Capitalism* H. van Zon,2016-05-01 Hans van Zon analyzes the financialization of developed capitalism and argues that the emergence of finance as a dominant force has contributed to the relative decline of the West He demonstrates that the neo liberal model is inherently unstable and undermines capitalist economies which can only function if they are embedded in institutions that are non or even pre capitalist He shows how a toxic combination of financialization corporate globalization and a deregulated and parasitic financial industry have led to structural economic stagnation in both the USA and the greater part of the EU **2025 CFA Program Curriculum Level I Box Set** CFA Institute,2024-10-16 Discover the official resource for success on the 2025 CFA Level I exam Get your copy of the CFA Program Curriculum now The 2025 CFA Program Curriculum Level I Box
