**0530 SPANISH (FOREIGN LANGUAGE)**

**0530/43**

Paper 43 (Continuous Writing), maximum raw mark 50

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, OCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

High stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught, and more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide, of the tensions between examinations and learning, and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as the diploma disease takes hold with an ever greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful

**How to Pool Risks Across Generations** Michael Otsuka,2023-05-28 How to Pool Risks across Generations makes the case for the collective provision of pensions on fair terms of social cooperation Through the insurance of a mutual association which extends across society and over multiple generations we share one another s fates by pooling risks across both space and time Resources are transferred not simply between different people but also within the possible future lives of each person from one s more fortunate to one s less fortunate future selves The book opens with an investigation of the longevity and investment risk that even a single individual on a desert island would face in providing for her old age From this atomistic starting point it builds up within and across the chapters to increasingly collective forms of pension provision By joining together it is possible to tame the risks we would face as individuals each with our own private pension pot A collective pension can be justified as a social union of social unions an enduring corporate body which is formed by agreements to pool risks in a manner that involves reciprocity between the various individuals that constitute the collective Even though all individuals age and die a collective pension scheme remains evergreen as the average age of members remains relatively unchanged through the influx of new members to replace those who retire It is therefore possible to smooth risks indefinitely across as well as within generations to the mutual advantage of each

**Orthodox Christian Material Culture** Timothy Carroll,2018-05-15 Although much has been written on the making of art objects as a means of engaging in creative productions of the self most famously Alfred Gell s work there has been very little written on Orthodox Christianity and its use of material within religious self formation Eastern Orthodox Christianity is renowned for its artistry and the aesthetics of its worship being an integral part of devout practice

Yet this is an area with little ethnographic exploration available and even scarcer ethnographic attention given to the material culture of Eastern Christianity outside the traditional homelands of the greater Levant and Eastern Europe Drawing from and building upon Gell's work Carroll explores the uses and purposes of material culture in Eastern Orthodox Christian worship Drawing on three years of ethnographic fieldwork in a small Antiochian Orthodox parish in London Carroll focusses on a study of ecclesiastical fabric but places this within the wider context of Orthodox material ecology in Britain This ethnographic exploration leads to discussion of the role of materials in the construction of religious identity material understandings of religion and pathways of pilgrimatic engagement and religious movement across Europe In a religious tradition characterised by repetition and continuity but also as sensuously tactile this book argues that material objects are necessary for the continual production of Orthodox Christians as art like subjects It is an important contribution to the corpus of literature on the anthropology of material culture and art and the anthropology of religion *New Directions in Mineral Processing, Extractive Metallurgy, Recycling and Waste Minimization* Ramana G.
