When the cab is raised to the point where the weight of the cab is greater in front of its hinges than to the rear, gravity will make it fall forward. It will fall at a controlled rate.

8. If you want the cab in the full forward position, pull the cable to disengage the mechanical lock. You may have to free the lock by raising or lowering the cab to relieve pressure on the locking mechanism.

WARNING! When the cab is tilted fully (90°), the roof-mounted antenna mast could injure someone. Remove or flag the mast before tilting the cab all the way forward.

CAUTION: When tilting the cab to the full tilt, or vice versa, hold the safety lock bar up to prevent it from engaging at the locked position. If it does lock, your cab could be severely damaged.
