CyberLit Marilyn Dover Newman, 2004 Elementary school media specialists and teachers routinely use children s picture books in their lessons These books add depth and vitality to the curriculum because they are written and illustrated by some of the world s most gifted writers and artists Yet educators are finding it increasingly harder to insert this pleasant and important activity into the busy school day due to increased pressures to improve test scores to implement a standards driven curriculum and to stay abreast of new technologies to deliver instruction This book helps educators continue to incorporate literature into the school day in spite of these obstacles CyberLit is a book for those who work with or teach others who work with children in the primary grades It is for those who use trade books to supplement and enhance health science creative writing history geography reading math language arts character education multicultural studies holidays

citizenship and the fine arts It s for those who love children s literature and book illustration With this book you no longer need to get lost in cyberspace The information has already been searched collected assessed and compiled Easily accessible and at your fingertips this directory can help you to get biographical information about authors and illustrators and to learn how they get ideas for stories how illustrations are created how to extend the books into the curriculum and where to find time saving lesson plans and book related activities for classroom projects and units These outstanding websites of children s authors illustrators and storybook characters were selected based on their educational value and for the fact that they contain a minimum of commercialization They are exemplary examples of authors publishers and scholars who understand and acknowledge the roles of teachers and librarians Like little gems in cyberspace they go beyond the ordinary content for busy educators

Plant Identification Anna Lawrence, William Hawthorne, 2006 First Published in 2006 Routledge is an imprint of Taylor Francis an informa company Education Outside the Classroom Great Britain. Parliament. House of Commons. Education and Skills Committee, 2005 The Committees report examines the wide range of outdoor learning experiences from lessons held within school grounds to residential expeditions abroad and considers the place of outdoor learning in the curriculum from foundation stage to higher education Issues discussed include the value of outdoor learning and the decline of opportunities for educational opportunities outside the classroom the barriers that deter schools from teaching outside the classroom including perceptions of risks in school trips the resources and curriculum time available for such trips availability and costs involved policy options for the Department for Education and Skills to help encourage schools improve and expand provision for outdoor learning and funding implications The Committees recommendations include that the DfES should issue a Manifesto for Outdoor Learning which gives all students the right to outdoor learning and which should attract a similar funding level to the music manifesto around 30 million in order to deliver real change

Journal of Biological Education ,1993 **Amphibian Survey and Monitoring Handbook** John W. Wilkinson, 2015-08-17 Evidence bases for conservation are becoming increasingly important to convince landowners and politicians of the need to take action in defence of species and habitats all around the world A valuable feature of this book is its emphasis on collecting and analysing such essential information Trevor Beebe Phyllomedusa Amphibians are among the most globally endangered groups of vertebrates with more than one third of species being assessed as declining or threatened Often amphibian declines can be attributed to a suite of interacting factors many of which are human in origin but further information is needed to elaborate the key causes and to discover ways of reversing declines Robust surveys provide vital ecological and biological data on amphibian populations and underpin the decisions made to protect species and reverse their declines Ongoing monitoring informs land managers and decision makers about whether they are taking the right action This book is designed to help you carry out amphibian surveying and monitoring so that the results of your surveys can be used effectively Part 1 introduces amphibians order Anura frogs and toads Caudata newts and salamanders and order

Gymnophonia caecilians Part 2 is essential reading before you start surveying It introduces the different types of survey and monitoring programmes and discusses survey aims and resources It contains chapters on collecting and handling survey data survey permissions and licencing health and safety and biosecurity and handling amphibians Part 3 discusses everything you need to know during your survey and provides a detailed look at amphibian survey methods Part 4 covers presenting and using your survey s data to best effect A useful resources section is also provided with example survey forms and details of additional information resources that will optimize the impacts of your surveys Key amphibian survey techniques are discussed with reference to published examples of successful surveys so you ll be able to choose what s right for your situation Tips on optimizing your survey effort and handling amphibians in the field are also included Whether carrying out a student expedition project or seeking information to support the management of a protected area this book contains essential advice from an amphibian ecologist who has encountered the same sorts of decisions you ll face when planning your surveys
