Exponential Transformation Salim Ismail, Francisco Palao, Michelle Lapierre, 2018-10-30 Today's top business challenge is adapting to accelerating technological change. We are in the early stages of the Fourth Industrial Revolution, characterized by the convergence of new exponentially advancing technologies that blur the lines between physical, digital, and biological realms. The results are a complete uprooting of industries the world over as entire production, management, and governance systems are impacted. The best-selling book *Exponential Organizations* by Salim Ismail explained why we are seeing the emergence of a new kind of organization: the Exponential Organization that thrives in the face of industry disruption and achieves its own exponential growth. Since the release of *Exponential Organizations* in 2014, Salim Ismail, Francisco Palao, and Michelle Lapierre have been working with leading organizations around the world, including Procter & Gamble, Unilever, Visa, Stanley Black & Decker, and Hewlett Packard, to help them apply Exponential Organization principles to avoid being disrupted and to take the lead in disrupting their own and other industries. The result is a ten-week process called the ExO Sprint that speeds up transformation while blocking the natural immune system response that organizations must overcome in order to successfully transform themselves. Salim's first bestseller was focused on why Exponential Organizations exist today. *Exponential Transformation* is a detailed handbook for applying Exponential Organization principles, giving individuals and organizations a step-by-step approach to follow to become their own ExO.

Transformation for Sustainable Business and Management Practices Aarti Saini, Vikas Garg, 2023-02-17 Since the introduction of Industry 5.0, there has been a greater emphasis on the human-centric view in human-machine collaboration. Azure ML Pipelines in Practice William Smith, 2025-08-19 *Azure ML Pipelines in Practice* is a comprehensive guide for machine learning engineers, data scientists, and DevOps professionals seeking to master the design, deployment, and management of end-to-end ML pipelines on the Azure platform. Beginning with fundamental concepts and architecture, the book navigates through core pipeline frameworks, secure environment setup, and orchestration strategies, providing readers with the practical knowledge needed to harness the full power of Azure Machine Learning services. Each chapter is meticulously structured to build both theoretical understanding and operational competence, addressing critical topics such as security, identity management, and environment configuration. Moving beyond the basics, the book delves into the intricacies of data engineering, scalable component design, and advanced workflow orchestration. Readers will learn essential techniques for data integration, versioning, and transformation, together with robust approaches to validation and privacy compliance. The treatment of modular and reusable component development is complemented by in-depth coverage of error handling, conditioning, parallelism, and efficient resource management, empowering practitioners to create maintainable, testable, and production-grade pipelines. The later

chapters focus on real world applications including distributed training hyperparameter tuning automated model evaluation and deployment automation The book addresses CI CD integration infrastructure as code strategies and operational monitoring for ongoing pipeline health while also tackling the nuances of scaling governance cost management and global deployment across enterprise environments Advanced patterns and emerging directions such as hybrid and multi cloud orchestration event driven flows edge IoT integration and extensibility with open source tools round out the volume making Azure ML Pipelines in Practice an indispensable resource for building resilient and future ready ML workflows in the cloud

Braverman Readings in Machine Learning. Key Ideas from Inception to Current State Lev Rozonoer, Boris Mirkin, Ilya Muchnik, 2018-08-30 This state of the art survey is dedicated to the memory of Emmanuil Markovich Braverman 1931 1977 a pioneer in developing machine learning theory The 12 revised full papers and 4 short papers included in this volume were presented at the conference Braverman Readings in Machine Learning Key Ideas from Inception to Current State held in Boston MA USA in April 2017 commemorating the 40th anniversary of Emmanuil Braverman s decease The papers present an overview of some

of Braverman's ideas and approaches. The collection is divided in three parts. The first part bridges the past and the present and covers the concept of kernel function and its application to signal and image analysis as well as clustering. The second part presents a set of extensions of Braverman's work to issues of current interest both in theory and applications of machine learning. The third part includes short essays by a friend, a student and a colleague.
