

## One more thing.....

---

- If two polygons are similar, then the ratio of their perimeters is equal to the ratios of their corresponding side lengths.

$$\frac{AB + BC + CD + DA}{EF + FG + GH + HE} = \frac{AB}{EF} = \frac{BC}{FG} = \frac{CD}{GH} = \frac{DA}{HE}$$

So the perimeter of ABCD is 22 and the perimeter of EFGH is 11. Also, a scale factor of 2:1!!

*Mechanics of Fluids for Mechanical Engineers* Janusz Maria Gasiorek, W. G. Carter, 1968      **The History of Mathematical Proof in Ancient Traditions** Karine Chemla, 2012-07-05 This radical profoundly scholarly book explores the purposes and nature of proof in a range of historical settings It overturns the view that the first mathematical proofs were in Greek geometry and rested on the logical insights of Aristotle by showing how much of that view is an artefact of nineteenth century historical scholarship It documents the existence of proofs in ancient mathematical writings about numbers and shows that practitioners of mathematics in Mesopotamian Chinese and Indian cultures knew how to prove the correctness of algorithms which are much more prominent outside the limited range of surviving classical Greek texts that historians have taken as the paradigm of ancient mathematics It opens the way to providing the first comprehensive textually based history of proof      **Mathematics Today, [brown, Grade 6]** Janet S.
