Numbers Stephen Ball, 2018-10-11 Social science researchers have become increasingly attentive to the role of numbers in contemporary life. Issues around big data, national test results and output and performance statistics are now routinely reported and debated in the media. Numbers are a powerful resource for governments as a means to manage and improve their populations and we are increasingly represented, organized and driven by an economy of numbers which inserts itself into more and more aspects of our lives. This book critically addresses some of the ways in which numbers are deployed in educational governance and practice and some of the consequences of this deployment for what it means to be educated, to teach and to learn. Recognising that numbers do not simply represent but that they change things and have real effects allows us to move beyond a system where difficult and important issues about what we want from education and from teachers are side-stepped in the push to improve our numbers. This collection offers a set of starting points from which we might speak back to numbers, drawing on research to explore how numbers change the way we think about ourselves and what we do. This book was originally published as a special issue of the Journal of Education Policy *Teaching: Dilemmas, Challenges & Opportunities* Robyn Ewing, Lisa Kervin, Christine Glass, Brad Gobby, Rosie Le Cornu, Susan Groundwater-Smith, 2019-09-26 We have not sought in this book to define best practice for you but have rather challenged you to think about ways in which to teach intelligently, insightfully and respectfully. How does a teacher deal with a student's challenging behaviour in the classroom? Is it fair to adopt information and communication technologies that favour students who have access to sophisticated devices such as tablets in their own home? How, during the professional experience, is an education student to act when his or her beliefs about learning are not congruent with those of the supervising teacher? Should students be

grouped in terms of their ability These and many more issues arise daily in our early childhood primary and secondary learning environments Teaching 6e takes a holistic approach to classroom teaching and learning It considers the complexities and opportunities embedded in meeting learners needs in diverse and ever changing contexts It encourages pre service teachers to become active learners of teaching how to think like teachers and to consider the fundamental aspects of teaching It directs pre service teachers to useful teaching resources in text in references and online Case studies and reflection opportunities encourage pre service teachers to consider their own strengths and issues the diversity of learning styles in their students their school and wider community as well as government and ethical requirements It raises student awareness of what it really means to teach and how they can do it Students will continue to refer to this well researched and easy to use text throughout their qualification in their professional placement and into their teaching career Tomorrow's Learning: Involving Everyone. Learning with and about Technologies and Computing Arthur Tatnall, Mary Webb, 2018-01-25 This book constitutes the refereed post conference proceedings of the 11th IFIP TC 3 World Conference on Computers in Education WCCE 2017 held in Dublin Ireland in July 2017 The 57 revised full papers and 10 short papers were carefully reviewed and selected from 116 submissions during two rounds of reviewing and improvement The papers are organized in the following topical sections futures of technology for learning and education innovative practices with learning technologies and computer science education and its future focus and development Also included is The Dublin Declaration which identifies key aspects of innovation development successes concerns and interests in relation to ICT and education
