Prelude To Everest:

Prelude to Everest Ian R Mitchell, George Rodway, 2014-11-26 Acclaimed hillwalking writers Ian R Mitchell and George Rodway tell the fascinating story of Aberdeen born Alexander Kellas and his contribution to mountaineering from the 20th century to the present day Now a largely neglected figure Kellas is the pioneer of high altitude physiology his climbing routes still in evidence today Follow Kellas journey which takes him from the Scottish Cairngorms to the Himalaya and discover how his struggles and explorations have impacted upon mountaineering today [Everest & Conquest in the Himalaya](#) Richard Sale, George Rodway, 2011-07-12 A history of those who have scaled Mount Everest and the advances in mountaineering over a century At one time the summits of the world s highest peaks Everest included were beyond reach Pioneering attempts to overcome the dangers of climbing at extremely high altitudes ended in failure sometimes with disastrous consequences Yet today high altitude ascents are frequent almost commonplace Everest can be conquered by relatively inexperienced mountaineers and their exploits barely merit media attention unless they go fatally wrong This dramatic history of Everest climbs describes in vivid detail the struggle to conquer the mountain and the advances in scientific knowledge that made the conquest possible It also offers compelling insight into the science of mountaineering as well as the physical and psychological challenges faced by individuals who choose to test themselves in some of the harshest conditions on earth

Higher and Colder Vanessa Heggie, 2019-08-02 During the long twentieth century explorers went in unprecedented numbers to the hottest coldest and highest points on the globe Taking us from the Himalaya to Antarctica and beyond *Higher and Colder* presents the first history of extreme physiology the study of the human body at its physical limits Each chapter explores a seminal question in the history of science while also showing how the apparently exotic locations and experiments contributed to broader political and social shifts in twentieth century scientific thinking Unlike most books on modern biomedicine *Higher and Colder* focuses on fieldwork expeditions and exploration and in doing so provides a welcome alternative to laboratory dominated accounts of the history of modern life sciences Though centered on male dominated practices science and exploration it recovers the stories of women s contributions that were sometimes accidentally and sometimes deliberately erased Engaging and provocative this book is a history of the scientists and physiologists who face challenges that are physically demanding frequently dangerous and sometimes fatal in the interest of advancing modern science and pushing the boundaries of human ability

Kangchenjunga Doug Scott, 2021-07-01 Kangchenjunga is the third highest mountain in the world and a notoriously difficult and dangerous mountain to climb First climbed from the west in 1955 by a British team comprising Joe Brown George Band Tony Streather and Norman Hardie it waited over twenty years for a second ascent The third ascent from the north followed in 1979 by a four man team including the visionary British alpinist Doug Scott Completed before his death in 2020 and edited by Catherine Moorehead Kangchenjunga is Doug Scott s final book Scott explores the mountain and its varied people the mountain sits on the border between Nepal and Sikkim in north east India before going on to look at Western approaches and early climbing attempts on the mountain Kangchenjunga was in fact long believed to be the highest mountain in the world until in the nineteenth century it was demonstrated that Peak XV Everest was taller Out of respect for the beliefs of the Sikkim no climber has ever set foot on the very top of Kangchenjunga the sacred summit Scott s own relationship with the mountain began in 1978 three years after his first British ascent of Everest with Dougal Haston The assembled team featured some of the greatest mountaineers in history Scott Joe Tasker Peter Boardman and Georges Bettembourg The plan was for a stripped down expedition the following spring minimal Sherpa support no radios largely self financed It was the first time a mountain of this scale had been attempted by a new and difficult route without the use of oxygen and with such a small team Scott Tasker and Boardman summited on 16 May 1979 further cementing their legends in this golden era Kangchenjunga is Doug Scott s tribute to this sacred mountain a paean for a Himalayan giant written by a giant of Himalayan climbing
