Strategies for Deconstructing Racism in the Health and Human Services Alma Carten,Alan Siskind,Mary Pender Greene,2016-06-07 Building on the successful outcomes of a five year initiative undertaken in New York City Alma Carten Alan Siskind and Mary Pender Greene bring together a national roster of leading practitioners scholars and advocates who draw upon extensive practice experiences and original research Together they offer a range of strategies with a high potential for creating the critical mass for change that is essential to transforming the nation s health and human services systems *Strategies for Deconstructing Racism in the Health and Human Services* closes the gap in the literature examining the role of interpersonal bias structural racism and institutional racism that diminish service access and serve as the root cause for the persistence of disparate racial and ethnic outcomes observed in the nation s health and human services systems The one of a kind text is especially relevant today as population trends are dramatically changing the nation s demographic and cultural landscape while funds for the health and human services diminish and demands for culturally relevant evidence based interventions increase The book is an invaluable resource for service providers and educational institutions that play a central role in the education and preparation of the health and human service workforce

Fifty Recipes to Stake Your Life On Charles Campion,2004-10-20 **Four Hundred Household Recipes** Four hundred household recipes,1868 *Food, Feminisms, Rhetorics* Melissa A. Goldthwaite,2017-06-19 Inspired by the need for interpretations and critiques of the varied messages surrounding what and how we eat *Food Feminisms Rhetorics* collects eighteen essays that demonstrate the importance of food and food related practices as sites of scholarly study particularly from feminist rhetorical perspectives Contributors analyze messages about food and bodies from what a person watches and

reads to where that person shops taken from sources mundane and literary personal and cultural This collection begins with analyses of the historical cultural and political implications of cookbooks and recipes explores definitions of feminist food writing and ends with a focus on bodies and cultures both self representations and representations of others for particular rhetorical purposes The genres objects and practices contributors study are varied from cookbooks to genre fiction from blogs to food systems from product packaging to paintings but the overall message is the same food and its associated practices are worthy of scholarly attention

Reading Practice Melissa Reynolds, 2024-08-19 Through portraits of readers and their responses to texts Reading Practice reconstructs the contours of the knowledge economy that shaped medicine and science in early modern England Reading Practice tells the story of how ordinary people grew comfortable learning from commonplace manuscripts and printed books such as almanacs medical recipe collections and herbals From the turn of the fifteenth century to the close of the sixteenth century these were the books English people read when they wanted to attend to their health or understand their place in the universe Before then these works had largely been the purview of those who could read Latin Around 1400 however medical and scientific texts became available in Middle English while manuscripts became less expensive These vernacular manuscripts invited their readers into a very old and learned conversation Hippocrates and Galen weren't distant authorities whose word was law they were trusted guides whose advice could be excerpted rearranged recombined and even altered to suit a manuscript compiler's needs This conversation continued even after the printing press arrived in England in 1476 Printers mined manuscripts for medical and scientific texts that they would publish throughout the sixteenth century though the pressures of a commercial printing market encouraged printers to package these old texts in new ways Without the weight of authority conditioning their reactions and responses to very old knowledge and with so many editions of practical books to choose from English readers grew into confident critics and purveyors of natural knowledge in their own right Melissa Reynolds reconstructs shifting attitudes toward medicine and science over two centuries of seismic change within English culture attending especially to the effects of the Reformation on attitudes toward nature and the human body Her study shows how readers learned to be discerning and selective consumers of knowledge gradually through everyday interactions with utilitarian books
