**Earthquakes and Coseismic Surface Faulting on the Iranian Plateau** Manuel Berberian, 2014-06-23 Earthquakes and Coseismic Surface Faulting on the Iranian Plateau is a comprehensive and well illustrated multi disciplinary research work that analyzes the human and physical aspects of the active faults and large magnitude earthquakes since ancient times on the Iranian Plateau The long term historical archaeological and sociological record of earthquakes discussed here gives insight into earthquake magnitudes recurrences fault segmentation clustering and patterns of coseismic ruptures from prehistoric times to the present The first part of the book examines oral traditions and literature of the region concerned with earthquakes particularly in folklore epic literature and theology The second part assesses dynamic phenomena associated with earthquakes including active tectonics archaeoseismicity and coseismic surface faulting throughout the twentieth century This work is a valuable technical survey and an essential reference for understanding seismic hazard analysis and earthquake risk minimization in earthquake prone developing and developed

countries throughout the world Provides a reference for seismic hazard evaluation and analysis Covers data dealing with crustal deformations caused by earthquake faulting and folding since historic times Presents unique and complete data for use in empirical relation analyses in all regions      *Human Casualties in Earthquakes* Robin Spence, Emily So, Charles Scawthorn, 2011-01-03 Assessment of human casualties in earthquakes has become a topic of vital importance for national and urban authorities responsible for emergency provision for the development of mitigation strategies and for the development of adequate insurance schemes In the last few years important work has been carried out on a number of recent events including earthquakes in Kocaeli Turkey 1999 Niigata Japan 2004 Sichuan China 2008 and L Aquila Italy 2009 These events have created new and detailed casualty data which has not until now been properly assembled and evaluated This book draws the new evidence from recent events together with existing knowledge It summarises current trends in the understanding of the factors influencing the numbers and types of casualties in earthquakes it offers methods to incorporate this understanding into the estimation of losses in future events in different parts of the world it discusses ways in which pre event mitigation activity and post event emergency management can reduce the toll of casualties in future events and it identifies future research needs      Russia's Foreign Energy Policy Kenan Aslanli, 2023-08-31 This book examines Russia's multidimensional foreign energy policy and the emerging and ongoing conflicts with energy consuming and transit countries Russia's Foreign Energy Policy examines whether the interdependence patterns shaped through various channels such as foreign trade investment finance technology and social interactions between Russia and energy importing countries could prevent energy based conflict Drawing on semi structured expert interviews Kenan Aslanli challenges the one sided conventional wisdom that focusses on foreign policy ambitions and overlooks the peculiarities of the energy dimension Instead Aslanli highlights the complexity of contemporary energy affairs using a holistic approach that goes beyond geopolitics He examines various energy types such as crude oil natural gas and nuclear and considers a diverse range of actors which include energy companies and international organizations Using examples from Europe Asia and the Middle East Aslanli demonstrates how the Russian strategy of using energy resources as a tool or energy weapon for foreign policy goals has a diminishing return in the long run This book will be of great interest to students and scholars of energy policy foreign policy and Russian studies more broadly      Earthquakes: Simulations, Sources and Tsunamis Kristy F. Tiampo, Dion K. Weatherley, Stuart A. Weinstein, 2008-11-04 This volume attempts to present the current state of seismic research by focusing not only on the modeling of earthquakes and earthquake generated tsunamis but also on practical comparisons of the resulting phenomenology In the 1990s major advancements in seismic research greatly added to the understanding of earthquake fault systems as complex dynamical systems Large quantities of new and extensive remote sensing data sets provided information on the solid earth      **Energy, Wealth and Governance in the Caucasus and Central Asia** Richard Auty, Indra de Soysa, 2006-08-21 Drawing upon recent progress in development economics and political science the book

provides fresh analysis of the Caucasus and Central Asia CCA countries transition to a market economy by tracing the impact of natural resource endowment. The book examines the synergies between energy rich and energy poor states and highlights the practical consequences of both well managed and poorly managed deployment of energy. Featuring contributions from prominent specialists on resource driven economies, the book argues that unless CCA elites change the way in which they deploy natural resource revenues, regional development will fall short of its potential with possible disastrous consequences. The contributors apply the experience of the developing market economies to demonstrate that the region still holds considerable potential to become an important stable supplier of raw materials and a source of industrial demand to the global economy. However, the CCA is equally likely to become a threat to the global economy as a consequence of the misuse of energy revenues to promote the interests of predatory political elites.
