Report On Tyre Industry:

Investment Report Geoff Nixon, O'Connor Grieve & Co. (N.Z.), 1983 **Report on Automotive Tyre Industry**, 1988

Tyre Industry Leah Tutt, 2014 **China Market Report** Albert Pan, 2012 Research reports on 100 major industries in China Providing concise analysis and key data on each of the industries Contents include market size analysis industry overview import export domestic hot regions market position of foreign investment top companies etc Cover

Nanotechnology and Tyres Greening Industry and Transport OECD, 2014-07-18 This report provides insights into the policy issues related to nanotechnology use in the tyre industry the status of nanotechnology innovation the economic and social costs and benefits their safe use and decision making **Studies and Reports**, 1923 **Studies and Reports**

International Labour Office, 1925 *Studies on the Structure of the Industrial Economy: Report on automotive tyre industry (phase II study)*, 1988 Light Vehicle Tyres Neil Mullineux, 2004 The tyre industry is the largest single rubber

manufacturing industry in the world The high performance demanded of tyres has led to extensive research and development in this field and constant innovation This report takes an overview of the latest technology combined with the market situation worldwide Three large companies Bridgestone Goodyear and Michelin now dominate the world tyre market with a share of about 56 per cent There then follow four mid sized companies which have about 18 per cent of the world market Continental Sumitomo Pirelli and Yokohama with a combined share of 17.6 per cent In total eleven companies account for 81.6 per cent of the world market Even though the largest companies have a turnover well in excess of USD10bn they remain largely specialist tyre manufacturers Many of the smaller companies also concentrate almost exclusively on tyres However the medium sized companies are diversifying away from tyre manufacturing Unusually if not uniquely in the automotive components industry the tyre manufacturers only sell a minority of their output to OEMs component is the size of the replacement market or aftermarket three quarters of road tyres are sold as replacement tyres and only one quarter as original equipment The big three tyre manufacturers dominate the OE market but other large regional players also have a share particularly in Europe Worldwide the replacement tyre market for light vehicles represents about 714m tyres The replacement tyre market is certainly more profitable for the tyre manufacturers but it has distinct problems The general problems of slow growth and market maturity are exacerbated by cyclical growth in supply to OEMs Despite the poor profitability of sales to OE customers and even though the replacement market represents over 70 per cent of the passenger car tyre industry's sales tyre makers profitability is also cyclical The replacement market is a relatively profitable sector of the overall tyre market but it cannot compensate for the vagaries of the OE market A traditional indication of market maturity is continual pricing pressure in the market small competitors to keep continual pressure on prices In broad terms a tyre which cost USD69.90 in 1979 sold for USD41.02 in 2003 The major companies within the tyre industry are all constrained by the laws of economics and subject to similar commercial pressures In very broad terms the cost of tyre

manufacture breaks into three parts raw materials labour and fixed costs The tyre industry has high fixed costs making it extremely difficult to improve returns unless costs are cut or market share gained Raw materials typically represent 25 per cent of the selling price of a car tyre Labour costs represent about 30 per cent of sales and this has led to a move for manufacture in lower labour cost countries This has been helped by relatively low transportation costs for the inter regional movement of tyres about USD1 2 for a passenger tyre In the last decade all manufacturers have tried to increase productivity in existing operations in order to become low cost producers The continuing drive for improved productivity has resulted in excess capacity in many areas and product sectors than demand There is a close relationship between aggregate supply and profitability for individual tyre companies As a result there have been gradual moves towards consolidation Before 1985 a dozen large companies dominated the world tyre market but after a rapid series of mergers and acquisitions seven companies emerged with three quarters of the market Chemical and Rubber Industry Report ,1962 *Tyrettech 91* Rapra Technology, iSmithers Rapra Publishing, 1991 **End-of-Life Tyres** Peter Dufton, 2001 Much has happened recently in the field of waste management and this has had a strong impact on the handling of used tyres This report provides up to date data and comment about the progress in the UK Europe and North America in the handling of the problem of used tyres once removed from vehicles Legislation in Europe is concentrating the minds of authorities and operators alike to provide sustainable solutions to the recovery and recycling of these tyres and to maximise the benefit from such activity **The Report: Mexico 2017** Oxford Business Group, Although economic openness left Mexico more exposed to the global financial crisis than some of its Latin American peers its economic profile has since allowed it to bounce back as global trade and investment flows recover Meanwhile Mexico has avoided the recent economic weakness of more commodity dependent economies in the region At the same time past structural reforms are starting to bear fruit and bode well for growth prospects in the medium to long term *Report on Economic and Commercial Conditions in the United States of America* ,1923 Reports Commonwealth Economic Committee, 1926 **Non-Tyre Rubber Components in the Automotive Industry** R. German, 1999 This report considers the implications of the trends within the industry for the rubber component industry including mergers and associations expansion of the platform approach and model globalisation **Studies and Reports, Series D (Wages and Hours)** International Labour Office, 1924 *Tyrettech 94 Conference* ,1994 **The Tyre Industry Reports** New Zealand Rubber Manufacturers' Association, 1968 *The World Rubber Industry* Colin Barlow, Sisira Jayasuriya, C Suan Tan, 2014-02-04 Despite the fact that Rubber is one of the world's major commodities surprisingly little has been written about the subject First published in 1994 The World Rubber Industry seeks to redress this deficiency It presents information in a clear and accessible manner with numerous tables and illustrations and an extensive glossary This is a comprehensive and definitive analysis of one of the world's major and most essential commodities
