**Conscripted** Femi Reis, 2021-10-18 The intensity of data breaches and ransomware attacks has been unprecedented Barely midway into the year 2021 we had recorded over 1000 ransomware attacks far exceeding what has ever been seen in previous years Millions of dollars have been paid in ransom and there have been thousands of reported data breaches affecting organizations of various sizes Depending on whose report you re reading 80% to 95% of these breaches are caused by human error in the workplace someone downloaded something she shouldn t have someone else forgot to download something he should have This proliferation of fatal errors has driven organizations to

increase their spending on employee cybersecurity awareness trainings in hopes that this will save the situation and exempt them from the fast growing list of cyberattack victims. However, this increase in awareness trainings does not seem to have changed much in the grand scheme of things. The curve of employee awareness trainings and corporate data breaches resulting from human error when plotted on a simple time graph both progress upward and to the right simultaneously. Recently it has been discovered that while awareness trainings produce immediate results, there are certain limitations in them that make those results short lived and the approach unsustainable. This book was born from a careful evaluation of those limitations in a bid to remedy the situation and provide enduring results. It is a self led boot camp that does not merely educate employees and employers with cybersecurity best practices for the workplace but goes much further to practically equip them with strategic tactics for effective combat in cyberwarefare within and outside the organization. If cyberspace is at war and indeed it is, then this book in your hands is a conscription plan.

**Netiquette** Matthew Strawbridge, 2006. This up to date book covers all aspects of Internet etiquette including email, discussion forums, online auctions, instant messaging and much more. It explains modern topics such as blogs and wikis and how netiquette applies to them. Although this book is suitable for beginners, even experts should find plenty to make them think. At once prescriptive and pragmatic, this book tells you in plain language how everyone would behave in a perfect world, giving you the knowledge to enable you to decide how you wish to present yourself online.

**Cyber-Risk Informatics** Mehmet Sahinoglu, 2016-05-23. This book provides a scientific modeling approach for conducting metrics based quantitative risk assessments of cybersecurity vulnerabilities and threats. This book provides a scientific modeling approach for conducting metrics based quantitative risk assessments of cybersecurity threats. The author builds from a common understanding based on previous class tested works to introduce the reader to the current and newly innovative approaches to address the maliciously by human created rather than by chance occurring vulnerability and threat and related cost effective management to mitigate such risk. This book is purely statistical data oriented, not deterministic, and employs computationally intensive techniques such as Monte Carlo and Discrete Event Simulation. The enriched JAVA ready to go applications and solutions to exercises provided by the author at the book's specifically preserved website will enable readers to utilize the course related problems. Enables the reader to use the book's website's applications to implement and see results and use them making budgetary sense. Utilizes a data analytical approach and provides clear entry points for readers of varying skill sets and backgrounds. Developed out of necessity from real in class experience while teaching advanced undergraduate and graduate courses by the author. Cyber Risk Informatics is a resource for undergraduate students, graduate students and practitioners in the field of Risk Assessment and Management regarding Security and Reliability Modeling. Mehmet Sahinoglu, a Professor 1990 Emeritus 2000, is the founder of the Informatics Institute 2009 and its SACS accredited 2010 and NSA certified 2013 flagship Cybersystems and Information Security CSIS graduate program, the first such full degree in class program in Southeastern USA at AUM Auburn University's metropolitan

campus in Montgomery Alabama He is a fellow member of the SDPS Society a senior member of the IEEE and an elected member of ISI Sahinoglu is the recipient of Microsoft s Trustworthy Computing Curriculum TCC award and the author of Trustworthy Computing Wiley 2007      **Stay Safe!** Abdul B.
