Platonism conceptualism and nominalism in the writings of a broad range of modern thinkers      The Development and Principles of International Humanitarian Law Michael N. Schmitt, 2017-07-05 The essays selected for the first part of this volume offer an insight into the development as distinguished from the history of international humanitarian law The focus of the majority of the works reprinted here is on an analysis of the adequacy of the law as it stood at the time of the respective publication and in the light of existing contemporary armed conflicts and military operations Thus the reader is afforded an in depth look at the early roots of international humanitarian law the continuing relevance of that body of law despite advances in weapons technology and the efforts to progressively develop it International humanitarian law s development cannot be considered in isolation from its principles The essays selected for the second part of the volume deal with the two fundamental principles underlying all of international humanitarian law humanity and military necessity The articles on the principles of humanity include reflections on the famous Martens Clause and the analyses of military necessity take no account of *Kriegsraison* Moreover they offer proof of the customary character of the principle of distinction in land air and naval warfare      *Enterprise Information Systems* Joaquim Filipe, Michał Śmiałek, Alexander Brodsky, Slimane Hammoudi, 2021-04-30 This book constitutes extended revised and selected papers from the 22nd International Conference on Enterprise Information Systems ICEIS 2020 held online during May 5 7 2020 The 41 papers presented in this volume were carefully reviewed and selected for inclusion in this book from a total of 255 submissions They were organized in topical sections as follows database and information systems integration artificial intelligence and decision support systems information systems analysis and specification software agents and internet computing human computer interaction and enterprise architecture      **Trees & Shrubs of the Trans-Pecos and Adjacent Areas** A. examination of how actors analogies and narratives are produced and deployed into strategy debates the reasons for counterinsurgency s emergence in crisis periods can be determined This approach enables a better understanding of the dynamics of policy making and how geostrategic change occurs Phonological Studies Roman Jakobson,2012-01-02 No detailed description available for Phonological Studies The Bradley Bibliography: Dendrology. 1911-12 Alfred Rehder,1914 **Personnel Information Bulletin** United States.
