Project Management for Research Adedeji B. Badiru, Christina F. Rusnock, Vhance V. Valencia, 2016-04-21 Graduate research is a complicated process which many undergraduate students aspire to undertake The complexity of the process can lead to failures for even the most brilliant students Success at the graduate research level requires not only a high level of intellectual ability but also a high level of project management skills Unfortunately many graduate students have trouble planning and implementing their research Project Management for Research A Guide for Graduate Students reflects the needs of today's graduate students All graduate students need mentoring and management guidance that has little to do with their actual classroom performance Graduate students do a better job with their research programs if a self paced guide is available to them This book provides such a guide It covers topics ranging from how to select an appropriate research problem to how to schedule and execute research tasks The authors take a project management approach to planning and implementing graduate research in any discipline They use a conversational tone to address the individual graduate student This book helps graduate students and advisors answer most of the basic questions of conducting and presenting graduate research thereby alleviating frustration on the part of both student and advisor It presents specific guidelines and examples throughout the text along with more detailed examples in reader friendly appendices at the end By being more organized and prepared to handle basic research management functions graduate students along with their advisors will have more time for actual intellectual mentoring and knowledge transfer resulting in a more rewarding research experience

Status of the Dosimetry for the Radiation Effects Research Foundation (DS86) National Research Council, Division on Earth and Life Studies, Board on Radiation Effects Research, Committee on Dosimetry for the Radiation Effects Research Foundation, 2001-09-04 The Committee on Dosimetry for the Radiation Effects Research Foundation RERF was set up more than a decade ago at the request of the U S Department of Energy It was charged with monitoring work and experimental results related to the Dosimetry System 1986 DS86 used by RERF to reconstruct the radiation doses to the survivors in Hiroshima and Nagasaki At the time it was

established DS86 was believed to be the best available dosimetric system for RERF but questions have persisted about some features especially the estimates of neutrons resulting from the Hiroshima bomb This book describes the current situation the gamma ray dosimetry and such dosimetry issues as thermal neutron discrepancies between measurement and calculation at various distances in Hiroshima and Nagasaki It recommends approaches to bring those issues to closure and sets the stage for the recently convened U S and Japan Working Groups that will develop a new dosimetry for RERF The book outlines the changes relating to DS86 in the past 15 years such as improved numbers that go into and are part of more sophisticated calculations for determining the radiations from bombs that reach certain distances in air and encourages incorporation of the changes into a revised dosimetry system

Science Research Writing: For Native And Non-native Speakers Of English (Second Edition) Hilary Glasman-deal,2020-11-27 This book enables STEM researches to write effective papers for publication as well as other research related texts such as a doctoral thesis technical report or conference abstract Science Research Writing uses a reverse engineering approach to writing developed from extensive work with STEM researches at Imperial College London This approach unpacks current models of STEM research writing and helps writers to generate the writing tools needed to operate those models effectively in their own field The reverse engineering approach also ensures that writers develop future proof strategies that will evolve alongside the coming changes in research communication platforms The Second Edition has been extensively revised and updated to represent current practice and focuses on the writing needs of both early stage doctoral STEM researches and experienced professional researches at the highest level whether or not they are native speakers of English The book retains the practical user friendly format of the First Edition and now contains seven units that deal separately with the components of written STEM research communication Introduction Methods Results Discussion Conclusion Abstract and Title as well as extensive FAQ responses and a new Checklist and Tips section Each unit analyses extracts from recent published STEM journal papers to enable researches to discover not only what to write but crucially how to write it The global nature of science research requires fast accurate communication of highly complex information that can be understood by all participants Like the First Edition the Second Edition is intended as a fast do it yourself guide to make both the process and the product of STEM research writing more effective

Research Methodology and Strategy Patrick X. W. Zou,Xiaoxiao Xu,2023-08-01 Research Methodology and Strategy Provides comprehensive coverage of the entire research process methodologies strategies and their applications ideal for final year undergraduate Masters and PhD students academics researches and professionals Research Methodology and Strategy Theory and Practice is designed to help readers understand the research process and equip them with the skills required to successfully execute their projects In depth chapters describe the general research processes different research paradigms and their applications and criticism and more Written by authors with decades of research experience this authoritative textbook addresses the skills needed by all active researches including mixed method

research design and development data and technology driven research methodologies writing and publishing research outcomes strengthening research practice nexus and strategies for improving research impact and citations Provides a solid understanding of interdisciplinary research and analytical methods Offers clear guidance on the application of data driven and technology enabled research methods Covers qualitative quantitative and mixed methods research methodologies Discusses different case study research methods and practices Describes methods drawn from business management economics and social sciences research Provides strategies for thesis and journal article writing and publishing Provides theoretical frameworks and examples for research practice nexus and improving research impacts Research Methodology and Strategy Theory and Practice is an invaluable textbook for senior undergraduate masters and PhD research students academic and scientific researchers and industry professionals who perform research in the course of their work
