I. The Myths of the Bermuda Triangle A: Examples of theories and historical events. B: Environmental reasoning of the location.

II. The Popular Mystery of Flight 19 A: The legend of six fighter planes disappearing on a routine flight. B: How the Bermuda Triangle got its name from this mystery. C: The true occurrence of how the mission went and explanation of phenomena.

For years there has been an unsolved mystery of disappearances of boats and planes with no trace of evidence left behind. All of these conspiracies had relevance as to the whereabouts of these lost travelers. The locations of these disappearances were within a geographical triangle in the [Atlantic Ocean](#). The corners of this legendary triangle were [show more content...](#) But these dangerous spouts aren't capable of being spotted in the dark and any plane or ship that encounters one could be easily ripped to shreds (Berlitz 82). Clear air turbulence is another possibility for the loss of air planes. Clear air turbulence are areas a vacuum in the atmosphere caused by the jet stream which moves at speeds up to 200 knots per hour (Berlitz 85). This natural force cannot be detected by any present day technology (Berlitz 84). There are also electromagnetic problems in this area. Accident investigators believe this may be responsible for the disappearances (Kushe 13). This causes problems with the compass and any other feature that may deter a navigator. This isn't the only place on the world that causes these obscurities. Another place that shows these same problems is The Devil's Sea off the coast of Japan (Kushe 12). Some scientists believe that these places might have once been the location of one of the earth's magnetic poles that changed in prehistoric times (Kushe 267). Finally, the topography of the ocean floor varies from extensive shoals around the islands to some of the deepest marine trenches in the world (Rosenburg no. 6). With the interaction of the strong currents over the many reefs the topography is in a state of constant flux and development of new navigational hazards is swift (Rosenburg no. 6). On the date December 5, 1945, the largest and

**Privatisation and Its Limits in Central and Eastern Europe** H. Engerer, 2001-06-18 Hella Engerer analyses the emergence, evolution and theory of property rights and establishes the limits for privatization of state-owned enterprises in the transitional economies of Eastern Europe. She counters the assumption that reduction of the state sector helps to create the basis for a private property system, showing that privatization actually presupposes a stable framework including property order. She makes use of an outstanding methodological approach reaching well beyond the limits of pure economic observation. This is a major contribution to the understanding of the emerging economic order of Central and Eastern Europe.

**A Curriculum for Social Justice** Liz Atkins, Louise

Misselke, Jeanette Hart, Sue Lambeth, Lorraine Barker, 2023-11-26 This book reports the outcomes of a research project which involved developing and implementing a research informed curriculum for low attaining further education students. Key aims of the curriculum were to ameliorate some of the social and educational disadvantages faced by the students and to support secure and sustainable transitions to employment or further education. The book begins by outlining the characteristics of the lowest attaining young people and considering the challenges they face. Subsequent chapters describe the educational and geographic contexts, the curriculum, and the pedagogical approaches adopted. It moves on to describe the outcomes of the project, drawing on narratives of individual students and staff to illustrate the benefits of a broader curriculum which acknowledges earlier disadvantage. The book concludes with a discussion of how the curriculum could be adapted in different contexts and considers the implications of such change in terms of policy, practice, future research, and social justice.

**Education and Working-Class Youth** Robin Simmons, John Smyth, 2018-05-25 This book provides an inclusive and incisive analysis of the experiences of working class young people in education. While there is an established literature on education and the working class stretching back decades, comparatively there has been something of a neglect of class based inequality, with questions of gender, race, and other forms of identity attracting significant attention. However, events including Britain's 2016 decision to leave the European Union have thrown social class into sharp focus, both in the UK and elsewhere. Featuring leading thinkers in the sociology of education, this book examines the different ways in which young people relate to various parts of the education system, including different forms of schooling, post-compulsory and university education. They maintain that the issue of social class goes beyond the walls of specific institutions to affect young people in a variety of ways, not only in the UK but across the globe. This book will be of great value and interest to students and scholars of the sociology of education, working class youth, and equality of opportunity. Energy Research Abstracts, 1980-03

**Backpacker Tourism and Economic Development** Mark P. Hampton, 2013-07-18 There has been a phenomenal growth of backpacker tourism from the overland routes to India in the 1960s to present day backpacker tourism across the less developed world. As a result, there has been significant economic development impacts of backpacker tourism upon local communities, especially in areas with the largest concentrations of backpackers: South and South East Asia, particularly Thailand, Indonesia, Malaysia, and India, as well as increasingly in Latin America. This volume provides a focused review of the economic development impacts of backpacker tourism in developing regions, furthering knowledge on how backpacker tourism can play a crucial role in development strategies in these areas. First, it reviews the origins of the backpackers with a detailed examination of their hippy predecessors on the overland trail, before discussing the emergence of modern backpackers, including social and cultural aspects and how new technologies are changing their experience. It then analyses the powerful economic development impacts of backpackers on local host communities in cities and rural areas, with a special focus on coastal destinations. Extensive case study material is used from backpacker destinations across Asia, Latin America,

and Africa In doing so the book provides original insights into how backpacker tourism is highly significant for poverty alleviation and effective local development since it has strong linkages to the local economy and less economic leakage than conventional tourism Written by a leading academic in this area this volume will be of interest to students of Tourism and Development Studies
