Introduction

The question of illegal immigrants has been a serious issue for some analysts in the country. While most citizens would see them as dangerous individuals, invading the country to secure jobs from them and control criminal activities, other stakeholder mark their importance in the economy. How they hurt America may take different viewpoints depending on the preceptor and attitudes that one has traditionally believed. Illegal immigrants may be defined differently, depending on their unlawful nature. In as much as a high number of immigrants are in the country, their presence has a significant implication on the population ranging from the economy, politics and societal factors; these factors are often viewed differently by different components of the society.

Background information on illegal immigrants

Unlawful settlers are essentially people who meet the borders without proper authority, and so their overall impression as criminals. This form of migration goes against national policies and immigration laws (Camarota). There are several types of immigrants who enter the country with different objectives. Some stay permanently, while others cross the border to fulfill interim goals. The largest numbers of immigrants by country of origin come from Mexico. Guatemala, India and china have also reported large numbers.

There are three indicators through which a person may be termed as an illegal immigrant; unauthorized crossing of borders, overstaying in a country beyond the legally allowed time, or through desecration of any laws of disclosure (FAIR). They vary, from those who legally cross borders without inspection, to those who get smuggled in containers. Those who overstay their permitted extent are averagely better educated and monetarily secure than those who illegally cross the border.
