Librarians of Babel Paola de Castro, 2009-01-30 A librarian's main task is to acquire, organize, process, retrieve, and disseminate information to all possible users but also to communicate and develop professional skills in this field. This collection offers an introduction to the different challenges that librarians and information specialists are called upon to carry out in order to achieve effective communication through different media. The main elements of professional writing, conference or workshop organization, power point presentations are outlined. Concise introduction to professional writing and conference organization. Easily understood even without background information. Based on practical experience rather than on theories.

How to Write, Publish, and Present in the Health Sciences Thomas Allen Lang, 2010 From the acclaimed author of the standard reference on reporting statistics in medicine, this new resource explains how to create effective scientific articles, research proposals, abstracts, posters, and slide presentations. It describes how to write efficiently and how to prepare tables, charts, graphs, illustrations, and images for publication. A wealth of key concepts, practical information, common mistakes, and helpful tips make this book invaluable.

Scientific English Robert A. Day, Nancy Sakaduski, 2011-06-16 This entertaining and highly readable book gives anyone writing in the sciences a clear and easy-to-follow guide to the English language. English is often regarded as one of the most difficult languages to master. Yet while the English language has a vocabulary of upwards of 500,000 words, it only uses nine parts of speech, and all of these words fall into one or more of those nine categories. *Scientific English: A Guide for Scientists and Other Professionals*, Third Edition, contains many simple revelations like this that make effective scientific writing in English easy even for those whose fluency is in another language. The book is organized around a basic guide to English grammar that is specifically tailored to the needs of scientists, science writers, science educators, and science students. The authors explain the goals of scientific writing, the role of style, and the various kinds of writing in the sciences, then provide a basic guide to the fundamentals of English and address problem areas such as redundancies, abbreviations, and acronyms, jargon, and foreign terms. Email, online publishing, blogs, and writing for the Web are covered as well. This book is designed to be an enlightening and entertaining read that can then be retained as a practical scientific writing reference guide.
