Achieving Nelson Mandela University? Sibongile Muthwa, Denver A. Webb, 2024-08-20 South Africa s higher education sector is rooted in the country s divided past A significant State driven restructuring from around 1997 to 2005 resulted in what is largely the current configuration of public universities But just over two decades later for a variety of reasons the higher education sector in South Africa appears beset with numerous challenges Nelson Mandela University is one of the public universities that emerged from the restructuring process The university is in an ongoing state of evolution of becoming It developed out of the amalgamation of the University of Port Elizabeth Port Elizabeth Technikon and incorporation of the Port Elizabeth campus of Vista University as Nelson Mandela Metropolitan University in 2005 In 2017 it was renamed Nelson Mandela University after the world renowned statesman rather than the metropolitan area in which the university is primarily located The renaming was conceptualised as more than a marketing opportunity to rebrand the university but as an opportunity to reorientate the university to reposition Nelson Mandela University as an engaged and socially embedded university in the service of society striving to be the academic expression of the values and ethos of its iconic namesake Endeavouring to be something greater and different from the norm imbues its strategy public statements and practices The determination to achieve Mandela University serves or is intended to serve as both an organising principle and a lodestar A cross section of writers from different backgrounds situates Nelson Mandela University within the contemporary historical moment from which it emerged and examines its subsequent evolution While Nelson Mandela University has performed the usual work expected of any university it has also sought to turn the university outwards to achieve a higher purpose framing itself as a values based university on a journey to become something else In *Achieving Nelson Mandela University* the university attempts to give an account of itself The book is an intellectual and scholarly reflection on where the university has come from and where it is seeking to go

information security awareness and culture and training information security professionals *The Globalization of Internationalization* Hans de Wit, Jocelyne Gacel-Ávila, Elspeth Jones, Nico Jooste, 2017-01-20

The Globalization of Internationalization is a timely text which gives voice to emerging perspectives as an increasing range of countries engage in the process of internationalization. The pressure to internationalize cannot be ignored by institutions anywhere in today's world yet the dominant paradigms in the conception of internationalization traditionally come from the English speaking world and Western Europe. This book sets out to offer alternative viewpoints. Different dimensions and interpretations of internationalization in countries and regions whose perspectives have received little attention to date provide food for thought and help to broaden understanding of its application in alternative contexts. Combining diverse perspectives from around the world, this new volume in the *Internationalization in Higher Education* series seeks answers to key questions such as: What are the main characteristics of internationalization viewed from different cultural and regional backgrounds and how do they differ from traditional models such as in Western Europe, North America and Australasia? What issues in different global contexts have an impact on internationalization processes? What are the key challenges and obstacles encountered in developing innovative and non traditional models of internationalization? With contributions from world renowned international authors and perspectives from countries and contexts seen only rarely in the literature, *The Globalization of Internationalization* offers distinctive overviews and insights while exploring a range of thematic and regional issues arising from these considerations. This will be essential reading both as an academic resource and a practical manual for university leaders, academics, higher education policy advisers and non governmental organizations which fund higher education.

Facilitating Community Research for Social Change Casey Burkholder, Funké Aladejebi, Joshua Schwab-Cartas, 2022-03-31

Facilitating Community Research for Social Change asks what does ethical research facilitation look like in projects that seek to move toward social change. How can scholars weave political and social justice through multiple levels of the research process? This edited collection presents chapters that investigate research facilitation in ways that specifically attempt to disrupt and challenge anti Indigenous and anti Black racism, ableism, homophobia, transphobia, patriarchy and sexism to work toward social change. It also explores what it means to develop facilitation practices across multiple contexts and research settings including specific facilitation methods considered by researchers working with visual and community based methods with Black Indigenous and racialized communities. The complexities of how scholars negotiate decisions within their research with people and communities have an effect not only on how researchers construct their participants and communities but also on the overall purpose of projects, the ways their projects are shared and disseminated and what is learned in the doing of facilitation. This book will be of great interest to both emerging and established researchers working within the social sciences. It specifically attends to diverse fields within the social sciences that include health, media studies, environmental studies, social work, sociology, education, participatory visual research methodologies as well as the evolving field of digital
