Low-Power CMOS Digital Pixel Imagers for High-Speed Uncooled PbSe IR Applications Josep Maria

Margarit, 2016-12-29 This book describes the development of a new low cost medium wavelength IR MWIR monolithic imager technology for high speed uncooled industrial applications It takes the baton on the latest technological advances in the field of vapor phase deposition VPD PbSe based MWIR detection accomplished by the industrial partner NIT S L adding fundamental knowledge on the investigation of novel VLSI analog and mixed signal design techniques at circuit and system levels for the development of the readout integrated device attached to the detector In order to fulfill the operational requirements of VPD PbSe this work proposes null inter pixel crosstalk vision sensor architectures based on a digital only focal plane array FPA of configurable pixel sensors Each digital pixel sensor DPS cell is equipped with fast communication modules self biasing offset cancellation analog to digital converter ADC and fixed pattern noise FPN correction In pixel power consumption is minimized by the use of comprehensive MOSFET subthreshold operation

Technically Together Taylor Dotson, 2024-02-06 Why we should not accept networked individualism as the inevitable future of community If social interaction by social media has become the modern front porch as one sociologist argues offering richer and more various contexts for community and personal connection why do we often feel lonelier after checking Facebook For one thing as Taylor Dotson writes in Technically Together Try getting a Facebook status update to help move a couch or stay for dinner Dotson argues that the experts who assure us that networked individualism will only bring us closer together seem to be urging citizens to adapt their social expectations to the current limits of technology and discouraging them from considering how technologies could be refashioned to enable other ways of relating and belonging Dotson characterizes different instantiations of community as thick or thin depending on the facets and manifestations of togetherness that they encompass Individuating social networks are a form of community he explains but relatively thin in regard to several dimensions of communality Dotson points out that current technological practices are not foreordained but supported by policies economic arrangements and entrenched patterns of thought He examines a range of systems organizations and infrastructures from suburban sprawl and smartphones to energy grids and cry it out sleep training for infants and considers whether they contribute to the atomization of social life or to togetherness and community vibrancy Dotson argues that technology could support multifaceted communities if citizens stopped accepting the technological status quo and instead demanded more from their ever present devices
