Comprehensive Materials Processing, 2014-04-07 Comprehensive Materials Processing Thirteen Volume Set provides students and professionals with a one stop resource consolidating and enhancing the literature of the materials processing and manufacturing universe. It provides authoritative analysis of all processes, technologies and techniques for converting industrial materials from a raw state into finished parts or products. Assisting scientists and engineers in the selection, design and use of materials whether in the lab or in industry, it matches the adaptive complexity of emergent materials and processing technologies. Extensive traditional article level academic discussion of core theories and applications is supplemented by applied case studies and advanced multimedia features. Coverage encompasses the general categories of solidification, powder deposition and deformation processing and includes discussion on plant and tool design, analysis and characterization of processing techniques, high temperatures studies and the influence of process scale on component characteristics and behavior. Authored and reviewed by world class academic and industrial specialists in each subject field. Practical tools such as integrated case studies, user defined process schemata and multimedia modeling and functionality. Maximizes research efficiency by collating the most important and established information in one place with integrated applets linking to relevant outside sources.

A Psychologist's Casebook of Crime Belinda Winder, Philip Banyard, 2017-09-16 From burglary to stalking, *A Psychologist's Casebook of Crime* is the indispensable book for forensic psychology students. It tackles a wide range of offences such as arson, domestic violence, terrorism and murder, and its A to Z format provides all of the important information in a readily accessible way. Its chapter structure allows you to compare different crimes according to facts, figures and typical offender profiles, while providing fascinating case studies and a psychological perspective specific to each crime. With contributions from authors who are experts in their field, this innovative text provides an up to date review of how forensic psychologists think about and deal with a variety of crimes. This accessible student friendly book is the perfect accompaniment for anyone wishing to learn more about forensic psychology.

Ecology of Freshwater and Estuarine Wetlands Dr. Darold P. Batzer, Rebecca R. Sharitz, 2014-12-06 This second edition of this important and authoritative survey provides students and researchers with up to date and accessible information about the ecology of freshwater and estuarine wetlands. Prominent scholars help students understand both general concepts of different wetland types as well as complex topics related to these dynamic physical environments. Careful syntheses review wetland soils, hydrology and geomorphology, abiotic constraints for wetland plants and animals, microbial ecology and biogeochemistry, development of wetland plant communities, wetland animal ecology and carbon dynamics and ecosystem processes. In addition, contributors document wetland regulation policy and assessment in the US and provide a clear roadmap for adaptive management and restoration of wetlands. New material also includes an expanded review of the consequences for wetlands in a changing global environment. Ideally suited for wetlands ecology courses.
