NEWTON's proposed innovative technologies and pedagogies include adaptive multimedia and multiple sensorial media, virtual reality, fabrication, and virtual labs, gamification, personalisation, game-based learning, and self-directed learning pedagogies. The main objectives are to encourage STEM education among younger generations and to attract students to STEM subjects, making these subjects more appealing and interesting. Real-life deployment of NEWTON technologies and developed educational materials in over 20 European educational institutions at primary, secondary, and tertiary levels demonstrated statistically significant increases in terms of learner satisfaction, learner motivation, and knowledge acquisition.
