Leake, 2014-02-25 Psychology and philosophy have long studied the nature and role of explanation More recently artificial intelligence research has developed promising theories of how explanation facilitates learning and generalization By using explanations to guide

learning explanation based methods allow reliable learning of new concepts in complex situations often from observing a single example The author of this volume however argues that explanation based learning research has neglected key issues in explanation construction and evaluation By examining the issues in the context of a story understanding system that explains novel events in news stories the author shows that the standard assumptions do not apply to complex real world domains An alternative theory is presented one that demonstrates that context involving both explainer beliefs and goals is crucial in deciding an explanation s goodness and that a theory of the possible contexts can be used to determine which explanations are appropriate This important view is demonstrated with examples of the performance of ACCEPTER a computer system for story understanding anomaly detection and explanation evaluation *Medical Genetics* Nathaniel H.
