Joost and Amor Gavin Prins, 2013-10-10 The celebrated Springbok rugby hero Joost van der Westhuizen and his wife the singer Amor Vittone were a glamorous couple who captured the imagination of many South Africans. Known as their country's own Posh and Becks, they were blessed with success, fame, public adulation and an apparently happy marriage. Until a shock report appeared on the front page of a local Sunday newspaper about a sex video. In this book, the well-known journalist and a personal friend and confidante of the Van der Westhuizens, Gavin Prins, now recounts the story behind the story, one that has never been published before. Prins, who broke the sex video scandal on the front page of *Rapport*, chronicles how a simple farm boy who had become a national rugby hero met the woman of his dreams and married her, only to fall from grace in the most publicly humiliating way possible. With his confession came a measure of redemption until he was brought to his knees by a life-threatening illness. Hard hitting, often shocking but ultimately uplifting, this is the true story behind the sensational headlines that have dogged South Africa's most high profile couple.

Automotive FDI in Emerging Europe A. J. Jacobs, 2017-06-19 This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

Intelligent Video Surveillance Systems Jean-Yves Dufour, 2012-12-14 Belonging to the wider academic field of computer vision, video analytics has aroused a phenomenal surge of interest since the current millennium. Video analytics is intended to solve the problem of the incapability of exploiting video streams in real time for the purpose of detection or anticipation. It involves analyzing the videos using algorithms that detect and track objects of interest over time and that indicate the presence of events or suspect behavior involving these objects. The aims of this book are to highlight the operational attempts of video analytics to identify possible driving forces behind potential evolutions in years to come and, above all, to present the state of the art and the technological hurdles which have yet to be overcome. The need for video surveillance is introduced through two major applications: the security of rail transportation systems and a posteriori investigation. The characteristics of the videos considered are presented through the cameras which enable capture and the compression methods which allow us to transport and store them. Technical topics are then discussed: the analysis of objects of interest, detection, tracking, and recognition, high-level video analysis which aims to give a semantic interpretation of the observed scene, events, behaviors.
