Roma Barocca History Of An Architectonic Culture:

Roma Barocca Paolo Portoghesi, 1970 Roma Barocca comprises a complete history of building activity in Rome from about 1600 to 1750 But it acquires a far broader interest because of the critical method which it applies to one of the key periods and centers in the history of architecture and urbanism The discussion includes a broad summary of the urban policies and building programs of the popes as well as an analytic history of the artistic culture of Rome as documented by the theoretical writings and architectural publications of the period Against this historical background the basic formal principles and compositional methods of the Baroque are verified through critical and technical analyses of the monuments themselves In this way the author is able to define those great themes which held the attention of the artistic world in the complex period known as Baroque the themes of infinity of the relativity of perceptions of the popular and vernacular artistic expression and the communicative force of art of history conceived as a continual development of technology as a factor of independence and autonomous authority for the arts and the theme of nature interpreted as a dynamic process The three great masters Bernini Borromini and Cortona are treated in individual chapters The dynamic eruption of creative energy manifest in the works of these architects whose contributions comprised the revolutionary use of light the unification of all the arts and above all the ability on both the architectonic and urban scales to operate directly on space is here analyzed with penetrating perspective But the lesser architects who worked contemporaneously with the masters are also fully discussed Architects of the generation following that of the masters such as Carlo Rainaldi and Carlo Fontana are studied critically in light of the rich legacy to which they fell heir and which they seriously undermined through their essentially regressive and conservative positions An integral part of the author's analyses are the many fascinating detailed photographs in great part executed by the author himself The illustrative analytical material is still further enriched by drawings inserted in the text or contained in the drawing appendix

Roma Barocca Paolo Portoghesi, 1970 [The Baroque in Architectural Culture, 1880-1980](#) Andrew Leach, John Macarthur, 2016-03-09 In his landmark volume *Space Time and Architecture* Sigfried Giedion paired images of two iconic spirals Tatlin's Monument to the Third International and Borromini's dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical

and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture Architectural Temperance Victor Deupi, 2015-03-05 Architectural Temperance examines relations between Bourbon Spain and papal Rome 1700 1759 through the lens of cultural politics With a focus on key Spanish architects sent to study in Rome by the Bourbon Kings the book also discusses the establishment of a program of architectural education at the newly founded Real Academia de Bellas Artes de San Fernando in Madrid Victor Deupi explores why a powerful nation like Spain would temper its own building traditions with the more cosmopolitan trends associated with Rome often at the expense of its own national and regional traditions Through the inclusion of previously unpublished documents and images that shed light on the theoretical debates which shaped eighteenth century architecture in Rome and Madrid Architectural Temperance provides readers with new insights into the cultural history of early modern Spain *Encyclopedia of Twentieth Century Architecture* R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclope dia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries **The Oxford Dictionary of Architecture** James Stevens Curl, Susan Wilson, 2015-02-26 Containing over 6 000 entries from Aalto to Zwinger and written in a clear and concise style this authoritative dictionary covers architectural history in detail from ancient times to the present day It also includes concise biographies of hundreds of architects from history excluding living persons from Sir Francis Bacon and Imhotep to Liang Ssu ch eng and Francis Inigo Thomas The text is complemented by over 260 beautiful and meticulous line drawings labelled cross sections and diagrams These include precise drawings of typical building features making it easy for readers to identify particular period styles This third edition of The Oxford Dictionary of Architecture has been extensively revised and expanded with over 900 new entries including hundreds of definitions of garden and landscape terms such as Baroque garden floral clock hortus conclusus and Zen garden design Each entry is followed by a mini bibliography with suggestions for further reading The full bibliography to the first edition previously only available online has also been fully updated and expanded and incorporated into this new edition This is an essential work of reference for anyone with an interest in architectural and

Rome from the Ground Up James H. S.
