Theory and Practice in Adult Literacy, Learning and Social Change Anna Robinson-Pant, Catherine Kell, 2025-08-21
Offering new theoretical empirical and methodological perspectives on adult literacy lifelong learning and social change this book challenges traditional debates on adult literacy and development The volume brings together debates and research from the Global South and Global North and is original in moving beyond descriptive accounts of adult literacy programmes classrooms and a focus on best practice It provides both a historical perspective on this field as well as looking forward to future research and pedagogical directions By broadening from an international development to a social change perspective this book offers an alternative starting point Unlike development social transformation does not set a specific agenda nor assume a certain endpoint The authors set out to investigate the why and how of the assumed connections between adult learning literacy and social change contributing a deeper understanding into the complex and often unpredictable processes involved As well as focusing on literacy learning in classrooms and educational programmes the book explores literacy practices and adult learning in everyday spaces including social movements religious poetry and community initiatives Case studies from different cultural contexts introduce alternative theoretical lenses like the concept of the enacted body to explore a woman's experience of learning and social change in Nepal or investigating how religious poetry shared between generations in Iran could be working against social change

While other books favor either a qualitative or quantitative approach to second language acquisition SLA research, this text is comprehensive in scope and does not privilege one approach over the other, illuminating the strengths of each and the ways in which they might complement each other. It also provides equal weight to the cognitive and socio-cultural approaches to SLA. Containing an array of focal studies and suggestions for further reading, this text is the ideal resource for students beginning to conduct L2 writing research as well as for more experienced researchers who wish to expand their approach to conducting research. **The Publishers Weekly**, 1926
