Bíos Roberto Esposito, 2008 Roberto Esposito is one of the most prolific and important exponents of contemporary Italian political theory Bíos his first book to be translated into English builds on two decades of highly regarded thought including his thesis that the modern individual with all of its civil and political rights as well as its moral powers is an attempt to attain immunity from the contagion of the extraindividual namely the community In Bíos Esposito applies such a paradigm of immunization to the analysis of the radical transformation of the political into biopolitics Bíos discusses the origins and meanings of biopolitical discourse demonstrates why none of the categories of modern political thought is useful for completely grasping the essence of biopolitics and reconstructs the negative biopolitical core of Nazism Esposito suggests that the best contemporary response to the current deadly version of biopolitics is to understand what could make up the elements of a positive biopolitics a politics of life rather than a politics of mastery and negation of life In his introduction Timothy Campbell situates Esposito's arguments within American and European thinking on biopolitics A comprehensive illuminating and highly original treatment of a critically important topic Bíos introduces an English reading public to a philosophy that will critically impact such wide ranging current debates as stem cell research euthanasia and the war on terrorism Roberto Esposito teaches
