Kauffman, Daniel P. Hallahan, Paige Cullen Pullen, 2017-05-25 The purpose of the Handbook of Special Education is to help profile and bring greater clarity to the already sprawling and continuously expanding field of special education To ensure consistency across the volume chapter authors review and integrate existing research identify strengths and weaknesses note gaps in the literature and discuss implications for practice and future research The second edition has been fully updated throughout to take into account recent changes to federal laws as well as the most current academic research and an entirely new section has been added on research methods in special education The Oxford Handbook of Positive Psychology C. R. Snyder, Shane J. Lopez, Lisa M. Edwards, Susana C. Marques, 2021 The Oxford Handbook of Positive Psychology is the seminal reference in the field of positive psychology which continues to transcend the boundaries of academia to capture the imagination of the general public Almost 20 years after the first publication of this groundbreaking reference this new third edition showcases how positive psychology is thriving in diverse contexts and fields of psychology Consisting of 68 chapters of the most current theory and research this updated handbook provides an unparalleled cross disciplinary look at positive psychology from diverse fields and all branches of psychology including social clinical personality counseling health school and developmental psychology Several new chapters

are included which highlight the latest research on positive psychology and neuroscience as well as growing areas for applications of positive psychology

Game-Based Assessment Revisited Dirk Ifenthaler, Yoon Jeon Kim, 2019-11-05 The capabilities and possibilities of emerging game based learning technologies bring about a new perspective of learning and instruction This in turn necessitates alternative ways to assess the kinds of learning that are taking place in the game based environments The field has been broadening the focus of assessment in game environments i e what we measure developing processes and methodologies that go beyond psychometrics practices i e how we go about assessment in games and implementing the game based assessment GBA in real contexts The current state of the field calls for a revisit of this topic to understand what we have learned from the research on this topic and how the GBA work changed how the field thinks about assessment beyond game environments Accordingly this comprehensive volume covers the current state of research methodology and technology of game based assessment It features four major themes what we are measuring in games how GBA has influenced how people do assessment beyond games new methods and practices and implementations of GBA The audience for this volume includes researchers graduate students teachers and professional practitioners in the areas of education instructional design educational psychology academic and organizational development and instructional technology

Curriculum Models for the 21st Century Maree Gosper, Dirk Ifenthaler, 2013-08-28 Changing student profiles and the increasing availability of mainstream and specialized learning technologies are stretching the traditional face to face models of teaching and learning in higher education Institutions too are facing far reaching systemic changes which are placing strains on existing resources and physical infrastructure and calling into question traditional ways of teaching through lectures and tutorials And with an ever increasing scrutiny on teaching and teachers accountability for positive educational outcomes the call for closer attention to learning teaching and most especially to the design and delivery of the curriculum is given increasing relevance and importance Research provides strong evidence of the potential for technologies to facilitate not only cognition and learning but also to become integral components in the redesign of current curriculum models Some Universities and individual academics have moved along this pathway developing new and innovative curriculum blending pedagogies and technologies to suit their circumstances Yet there are others unsure of the possibilities the opportunities and constraints in these changing times Curriculum Models for the 21st Century gives insights into how teaching and learning can be done differently The focus is on a whole of curriculum approach looking at theoretical models and examples of practice which capitalize on the potential of technologies to deliver variations and alternatives to the more traditional lecture based model of University teaching
