**How Qualitative Data Analysis Happens** Áine M Humble,M. Elise Radina,2024-08-12 How Qualitative Data Analysis Happens Moving Beyond Themes Emerged offers an in depth look into how qualitative social science researchers studying a wide range of human experiences and dynamics approach their data analyses This expanded edition consists of 13 new

chapters from a broad range of disciplines and an added conclusion that document the stories about how qualitative data analysis occurred. Chapters for this expanded edition represent a diversity of disciplines e.g. criminology, family science, education, health, nutrition, sociology, sport psychology that focus on the human experience and describe a diversity of methodological approaches. These chapters may be used to introduce readers to newer or innovative ways of analysing data. It moves beyond the usual vague statement of themes emerged from the data to show readers how researchers actively and consciously arrive at their themes and conclusions revealing the complexity and time involved in making sense of thousands of pages of interview data, multiple data sources and diverse types of data. The various authors provide detailed narratives into how they analysed their data from previous publications. The methodologies range from arts based research, autoethnography, community based participatory research, ethnography, grounded theory to narrative analysis. The volume allows readers to be seemingly in the room with these international scholars representing Canada, the US, Austria, Germany, the UK and the Philippines and getting their own hands vicariously dirty with the data. This expanded edition also includes a conclusion chapter in which the authors reflect on commonalities across the chapters. Supplemental figures, images and screenshots which are referred to in the chapters are included in an accompanying eResource that can be accessed at [www.routledge.com/9781032183213](http://www.routledge.com/9781032183213) as well as links to the previously published work on which the chapters are based. This book is an invaluable resource for experienced and novice qualitative researchers throughout the social sciences as well as undergraduate and postgraduate students in the field.
