operation of thinking with an emphasis on testimony and authority This book describes a lost tradition that can be called

reasonableness The tradition began with Aristotle was recommended to Western education by Augustine flourished in the

schools of the Renaissance through the nineteenth century then got lost in the academic and philosophic shuffles of the

twentieth century Representative of the tradition is John Locke s story of a King of Siam who rejected reports of the existence

of ice The King would have had to risk too much trust in another man whom he did not know too well a Dutch ambassador in

order to believe that elephants could walk on cold water John Locke presented the story to encourage his readers to think

about their responsibilities and risks entailed in what he called the gentle and fair ways of information The art of thinking is

largely social Popular textbook writers such as Quintilian Boethius Philipp Melancthon John of St Thomas Antoine Arnauld

Thomas Reid Isaac Watts Richard Whately William Hamilton L Susan Stebbings and Max Black taught strategies of belief

trust assent and even submission as part of reasonableness For over two thousand years testimony and authority were at the

center of lively discussions about teaching the art of thinking In the twentieth century the tradition faltered largely due to

Immanuel Kant s insistence that there should be no distinction between handling testimony and personal experience This

book recounts the history of a lively educational tradition and hopes to encourage its revival Rick Kennedy whose previous

books and articles have been about Colonial American logic mathematics and science is Professor of History at Point Loma
