

Weak valve springs effect the economy and power of the engine; therefore, each time the valves of an engine are ground, the valve springs should be checked to be sure they have not been weakened from the heat of the engine. This can easily be done by comparing the springs removed with a new spring from parts stock. Any springs that do not match up with the new spring should be replaced with new genuine Chevrolet springs.

The valve spring is retained to the valve with a cup and a key. It is necessary to compress the spring with the spring compressor shown in Fig. 71, which is a part of the cylinder head holding fixture, far enough to allow the keys to be inserted in the valve stem.

Fig. 71—Valve Spring Compressor

The valve springs are assembled with the close coiled end towards the cylinder head.

Installing Cylinder Head Assembly

It is good practice to install a new cylinder head gasket each time the cylinder head is removed.

Fig. 72—Cylinder Head Guide Pins

To properly align the cylinder head to the cylinder block and keep the cylinder head gasket in place and free from damage, the cylinder head guide pins illustrated in Fig. 72 should be used.

They screw into the cylinder block at the front and rear holes on the manifold side and guide the head into position.

After the head has been properly aligned, insert and tighten the cylinder head bolts with a wrench, tightening each one evenly a little at a time in the order shown in the cylinder head bolt tightening

Fig. 73—Cylinder Head Bolt Tightening Diagram

diagram, Fig. 73. The order in which the bolts are tightened is important, as many water leaks between the cylinders are caused by other than this method.

Rocker Arms and Shafts

There are three different rocker arms used in this new improved engine. One for the exhaust valves and two for the intake valves. These two

Fig. 74—Rocker Arm and Shafts

different arms for the intake valves have right and left hand angles. Right hand angle intake rocker arms are assembled to cylinders number 1, 3 and 5. Left hand angle intake arms are assembled to cylinders number 2, 4 and 6. Neither of these parts are interchangeable one with the other. They must be assembled as shown in Fig. 74.

The rocker arms sold through the parts department come with the bushings installed and reamed
