Network Simulation Experiments Manual Emad Aboelela, 2011-04-13 Network Simulation Experiments Manual Third Edition is a practical tool containing detailed simulation based experiments to help students and professionals learn about key concepts in computer networking. It allows the networking professional to visualize how computer networks work with the aid of a software tool called OPNET to simulate network function. OPNET provides a virtual environment for modeling analyzing and predicting the performance of IT infrastructures including applications servers and networking technologies. It can be downloaded free of charge and is easy to install. The book's simulation approach provides a virtual environment for a wide range of desirable features such as modeling a network based on specified criteria and analyzing its performance under different scenarios. The experiments include the basics of using OPNET IT Guru Academic Edition operation of the Ethernet network partitioning of a physical network into separate logical networks using virtual local area networks VLANs and the basics of network design. Also covered are congestion control algorithms implemented by the Transmission Control Protocol TCP the effects of various queuing disciplines on packet delivery and delay for different services and the role of firewalls and virtual private networks VPNs in providing security to shared public networks. Each experiment in this updated edition is accompanied by review questions a lab report and exercises. Networking designers and professionals as well as graduate students will find this manual extremely helpful. Updated and expanded by an instructor who has used OPNET simulation tools in his classroom for numerous demonstrations and real world scenarios. Software download based on an award winning product made by OPNET Technologies Inc whose software is used by thousands of commercial and government organizations worldwide and by over 500 universities. Useful experimentation for professionals in the workplace who are interested in learning and demonstrating the capability of evaluating different commercial networking products i.e. Cisco routers. Covers the core networking topologies and includes assignments on Switched LANs Network Design CSMA RIP TCP Queuing Disciplines Web Caching etc.

Design Technology for Heterogeneous Embedded Systems Gabriela Nicolescu, Ian O'Connor, Christian Piguet, 2012-02-02 Design technology to address the new and vast problem of heterogeneous embedded systems design while remaining compatible with standard Moore flows is capable of simultaneously handling both silicon complexity and system complexity represents one of the most important challenges facing the semiconductor industry today and will be for several years to come While the micro electronics industry over the years and with its spectacular and unique evolution has built its own specific design methods to focus mainly on the management of complexity through the establishment of abstraction levels the emergence of device heterogeneity requires new approaches enabling the satisfactory design of physically heterogeneous embedded systems for the widespread deployment of such systems Heterogeneous Embedded Systems compiled largely from a set of contributions from

participants of past editions of the Winter School on Heterogeneous Embedded Systems Design Technology FETCH proposes a necessarily broad and holistic overview of design techniques used to tackle the various facets of heterogeneity in terms of technology and opportunities at the physical level signal representations and different abstraction levels architectures and components based on hardware and software in all the main phases of design modeling validation with multiple models of computation synthesis and optimization It concentrates on the specific issues at the interfaces and is divided into two main parts The first part examines mainly theoretical issues and focuses on the modeling validation and design techniques themselves The second part illustrates the use of these methods in various design contexts at the forefront of new technology and architectural developments
