Light as Experience and Imagination from Medieval to Modern Times David S. Herrstrom, 2022-11-21 In *Light as Experience and Imagination from Medieval to Modern Times* David S. Herrstrom synthesizes and interprets the experience of light as revealed in a wide range of art and literature from medieval to modern times The true subject of the book is making sense of the individual's relationship with light rather than the investigation of light's essential nature while telling the story of light seducing individuals from the Middle Ages to our modern times Consequently it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light optical science but rather with subjective reactions as reflected in art architecture and literature Instead of its evolution this book celebrates the complexity of our relation to light's character No individual experience of light being truer than any other Optical Physics Stephen G. Lipson, Henry Lipson, David Stefan Tannhauser, 1995-07-27 This is the third edition of a successful and well established text Thoroughly revised and updated the book provides a comprehensive introduction to the fundamentals of optics and to a wide variety of more advanced areas of modern optical science Several new sections have been added including discussions of super resolved imaging phase retrieval in optical and X ray diffraction phase conjugate imaging and squeezed light interferometry Throughout the subject matter is developed by a combination of unsophisticated mathematics and physical intuition with particular emphasis being placed on Fourier analysis The very broad range of subjects treated together with the inclusion of many problems and over 300 diagrams and photographs will make the book of great use to undergraduate and graduate students of physics and to anyone working in the field of optical science Adaptive Optics and Short Wavelength Sources Stephen F.
