It is for everyone wishing to live sustainably and tread more lightly on the Earth. Permaculture is an ecologically sound approach to providing for our needs including our food, shelter, and financial and social structures. It is based on co-operating with nature and caring for the Earth and its people. Permaculture in a Nutshell is a concise and accessible introduction to the principles and practice of permaculture in temperate climates. It covers how permaculture works in the city, the country, and on the farm, and explores ways in which people can work together to recreate real communities. This inspiring book clearly describes how we can live fruitfully and sustainably and is essential reading for anyone wishing to reduce their environmental impact. **Toward Self-Sufficiency** George Hunt, 2018-11-16 George Hunt spent more than fifty years as a community planner and landscape architect. This included hands-on work in impoverished and low-income areas which helped him understand the dynamics that hold us back from achieving self-sufficiency. In this book, he outlines a sustainable community project that seeks to solve social problems that most community planners overlook. The pilot project includes numerous ways to make communities self-sufficient, and while it's geared for those in middle and lower income brackets, anyone can use its concepts. He explains how multiple purpose buildings can be used to house a diversity of people, ways to launch a business within the community by collaborating and sharing with others, how to obtain a vocational work study program offered on-site, and more. The book is also a reference manual on transition community design, creating a purpose, the meaning of happiness, sustainable agricultural practices, how to live without stuff, and how to reduce anxiety and depression. **Mass Intellectuality and Democratic Leadership in Higher Education** Joss Winn, Richard Hall, 2017-08-24 Higher education in the UK is in crisis. The idea of the public university is under assault, and both the future of the sector and its relationship to society are being gambled. Higher education is increasingly unaffordable; its historic institutions are becoming untenable, and their purpose is resolutely instrumental. What and who have led us to this crisis? What are the alternatives? To whom do we look for leadership in revealing those alternatives? This book critically analyses intellectual leadership in the university, exploring ongoing efforts from around the world to create alternative models for organizing higher education and the production of knowledge. Its authors offer their experience and views from inside and beyond the structures of mainstream higher education in order to reflect on efforts to create alternatives. In the process, the volume asks: is it possible to reimagine the university democratically and cooperatively? If so, what are the implications for leadership, not just within the university but also in terms of higher education's relationship to society? The authors argue that mass higher education is at the point where it no longer reflects the needs, capacities, and long-term interests of global society. An alternative role and purpose is required, based upon mass intellectuality or the real possibility of democracy in learning and the production of knowledge. *Research Handbook on Biodiversity and Law* Michael Bowman, Peter Davies, Edward Goodwin, 2016-04-29 The crucial importance of biodiversity
