

APA Style: Handling Quotations, Citations, and References

In-Text Quotations

When using APA format, follow the author-date method of citation. This means that the author's last name and the year of publication for the source should appear in the text, and a complete reference should appear in the reference list.

- *Example:*

Smith (1970) compared reaction times . . .

In a recent study of reaction times (Smith, 1970), . . .

In 1970, Smith compared reaction times . . .

Short Quotations

To indicate short quotations (fewer than 40 words) in your text, enclose the quotation within double quotation marks. Provide the author, year, and specific page citation in the text, and include a complete reference in the reference list. Punctuation marks such as periods, commas, and semicolons should appear after the parenthetical citation. Question marks and exclamation points should appear within the quotation marks if they are a part of the quotation but after the parenthetical citation if they are a part of your text. When paraphrasing, the citation (author and page number) must still be included. Paraphrasing is preferred over direct quoting.

- *Example:*

She stated, "The placebo effect disappeared when behaviors were studied in this manner" (Miele, 1993, p. 276), but she did not clarify which behaviors were studied.

According to Miele (1993), "The placebo effect disappeared when behaviors were studied in this manner" (p. 276).

Miele (1993) found that "the placebo effect disappeared" in this case (p. 276), but what will the next step in researching this issue be?

Long Quotations

Place quotations longer than 40 words in a freestanding block of typewritten lines, and omit quotation marks. Start the quotation on a new line, indented five spaces from the left margin. Type the entire quotation on the new margin, and indent the first line of any subsequent paragraph within the quotation five spaces from the new margin. Maintain double-spacing throughout. The parenthetical citation should come after closing punctuation mark.

- *Example:*

Miele's 1993 study found the following: The placebo effect disappeared when behaviors were studied in this manner. Furthermore, the behaviors were never exhibited again, even when real drugs were administered.

Earlier studies conducted by the same group of researchers at the hospital were clearly premature in attributing the results to a placebo effect. (p. 276)

Your Reference List

Your reference list should appear at the end of your essay. It provides the information necessary for a reader to locate and retrieve any source you cite in the essay. Each source you cite in the essay must appear in your reference list; likewise, each entry in the reference list must be cited in your text.

Basic Rules

The first line of each entry in your reference list should be on the left margin. Subsequent lines should be indented five spaces from the margin. All references should be double-spaced. Capitalize only the first word of a title or subtitle of a work. Italicize titles of books and journals. Note that the italicizing in these entries often continues beneath commas and periods. Each entry is separated from the next by a double space (thus the entire reference list is double spaced, with no extra returns added). Authors' names are inverted (last name first); give last name and initials for all authors of a particular work. Your reference list should be alphabetized by authors' last names. If you have more than one work by a particular author, order them by publication date, oldest to newest (thus a 1991 article would appear before a 1996 article). When an author appears as a sole author and as the first author of

Research Methods in Psychology Paul G. Nestor, Russell K. Schutt, 2014-03-12 The Second Edition of Paul G. Nestor and Russell K. Schutt's successful and unique *Research Methods in Psychology: Investigating Human Behavior* draws from substantive research stories to illustrate how research is presented while systematically unifying the entire research process within a conceptual framework. This accessible text examines engaging research studies and examples considering research ethics throughout. This is a great text that emphasizes the important concepts within research methods. The resources are excellent; they incorporate up-to-date research and technology and introduce the student to empirical articles and the information is presented in a way that challenges the student to apply the material. Maria Pacella, Kent State University. The text is comprehensive. It covers a wide variety of information without being overwhelming. This is a very good textbook for an introductory course in research methods. I like that its focus is on psychological research specifically. Angela M. Heads, Prairie View A.M. University

Writing for Publication in Nursing Marilyn H. Oermann, 2022-12-15 Designated a Doody's Core Title, *Writing for publication* is essential for disseminating nursing knowledge and this book will surely prepare budding authors and serve as a resource for experienced authors. It is a great reference for authors at all levels. Score 100 Five Stars. Doody's Medical Reviews. Teaching writing is the biggest challenge when teaching these courses, including the mechanics of writing and how to organize manuscripts. Manuscript writing is so much different than writing a paper for a grade. Students don't always appreciate the amount of time and attention to detail that a manuscript takes. This book is excellent. Gives the students a broad overview of writing yet includes specifics such as how to create tables. Kimberly Whiteman, DNP, MSN, Waynesburg University. Praise for previous edition: This award winning book has helped thousands of nursing students and nurses produce high quality work with its focus on all aspects of writing for professional publication. The new fifth edition offers two color design to enhance the reading experience, expanded coverage on selecting a journal, conducting and reporting a literature review, reporting evidence syntheses and preparing DNP projects as manuscripts as well as a greater variety of journal examples. A full chapter on writing research reports makes this edition particularly useful for PhD students and researchers. Designed for nursing students in MSN, DNP and PhD programs along with faculty and practitioners interested in disseminating their scholarship, this comprehensive resource demystifies the process of writing for publication with easy to follow examples and expert guidance. It leads nurses step by step through scholarly writing from idea to publication with clear direction for a multitude of writing formats including case reports, editorials, chapters, books and more. Instructor Resources include a sample course syllabus, an online course with 17 modules and PowerPoints for each module. New to the Fifth Edition: Enhanced reading experience with two color design. Expanded coverage of literature reviews, writing research reports and manuscripts on quality improvement and content related to publishing DNP scholarly projects. Types of evidence syntheses, steps to follow and reporting guidelines. Increased

guidance on selecting a journal and open access Responding to peer reviews Greater variety of journal examples reflecting expanded publishing options Key Features Takes readers through the entire process of writing for publication from idea to completion Delivers strategies for conducting and writing literature reviews research reports evidence syntheses quality improvement and clinical practice articles chapters books and more Includes learner exercises to guide development of competencies in each chapter Offers tips for turning dissertations DNP scholarly projects and course assignments into manuscripts Details submission editorial review and publication processes

moles and molar mass test questions and answers proprofs - Dec 07 2022

web jun 26 2023 the mass of 0.01 mol of hydrogen gas H_2 is 0.02g this is because the molar mass of H_2 is 2 g mol⁻¹ 1 g mol⁻¹ for each hydrogen atom so multiplying the molar mass by the number of moles gives the mass in this case 0.01 mol multiplied by 2 g mol⁻¹ equals 0.02g therefore the correct answer is 0.02g
