No power / won't get into programming mode

1) Verify that the connection interface. Make sure the PSWIP5 is connected to vehicle's battery, not constant battery. Otherwise, programming is not.

The PSWIP5 controls the doors immediately without pressing any buttons on the steering wheel

During programming, press the buttons on the steering wheel firmly with the PSWIP5 turn off. Releasing the button too early will cause the PSWIP5 to send out a signal even when no buttons are pressed.

The PSWIP5 controls the radio when on the steering wheel is turned (mostly late 80's early 90's Honda/Acura)

Program button PSW5 (2) for version 4.1.

When user's program a new button the previous button does not work

When programming, all buttons during programming. If you try to program another button, all previous button will be stored. You will have to release all previous buttons again.
